Declaration of Consolidated Financial Report of Affiliated Companies

The companies to be included by the Company in the consolidated financial statement of affiliated enterprises in 2021 (January 1, 2021 – December 31, 2021) pursuant to the Criteria Governing Preparation of Affiliation Reports, Consolidated Business Reports and Consolidated Financial Statements of Affiliated Enterprises are the same as those to be included in the consolidated financial report of the parent company and subsidiaries pursuant to the Statement of International Financial Reporting Standards (IFRS) No. 10. Further, the related information to be disclosed in the consolidated financial report of affiliated enterprises has been disclosed in the said consolidated financial report of the parent company and subsidiaries. Accordingly, it is not necessary for the Company to prepare the consolidated financial report of affiliated enterprises separately.

In witness thereof, the Declaration is hereby presented.

Company name: Kenmec Mechanical Engineering Co., Ltd.

Person in charge: CHING-FU HSIEH

March 18, 2022

Independent Auditors' Report

To KENMEC MECHANICAL ENGINEERING CO., LTD.:

Audit opinion

We audited the consolidated balance sheets of KENMEC MECHANICAL ENGINEERING CO., LTD. and its subsidiaries (Kenmec Group) as of December 31, 2021 and 2020, the consolidated statements of comprehensive income, consolidated statements of changes in equity and consolidated statements of cash flows for the periods from January 1 to December 31, 2021 and 2020, and the notes to the consolidated financial statements (including the summary of significant accounting policies).

In our opinion, the said consolidated financial reports were prepared in accordance with the Regulations Governing the Preparation of Financial Reports by Securities Issuers, and thus presented fairly, in all material aspects, the consolidated financial positions of the Kenmec Group as of December 31, 2021 and 2020, and the consolidated financial performance and cash flows for the periods from January 1 to December 31, 2021 and 2020.

Basis of Audit Opinions

The audit is conducted in accordance with the Regulations Governing Auditing and Attestation of Financial Statements by Certified Public Accountants and the generally accepted auditing standards. Our responsibilities under such standards are further described in the "CPA's responsibility for the audit of the consolidated financial statements" section in this report. We were independent of Kenmec Group, in accordance with the Norms of Professional Ethics for Certified Public Accountants and fulfilled all other responsibilities thereunder. We believe that we acquired sufficient and appropriate audit evidence to use as the basis of our audit opinions.

Key Audit Matters

Key audit matters are those matters that, in our professional judgment, were of most significance in the audit of the consolidated financial statements of Kenmec Group for the year of 2021. Such matters were addressed during the overall audit of the consolidated financial statements and the process of forming the audit opinions, and thus we did not provide opinions separately regarding such matters.

The key audit matters in the audit of the consolidated financial statements of Kenmec Group for the year of 2021 are as follows:

Project incomes recognized on the basis of stage of completion

As KENMEC is mainly engaged in contracting automation projects, its project income is recognized based on the degree of the completion of contracts. The estimated total cost of projects is an important factor in calculating the percentage of completion. The estimated total costs of projects and contract items are evaluated and judged by management based on the nature of projects, estimated contract amounts, project approaches and work methods. However, due to the long duration of the work period, the contracts are likely to be affected by fluctuations in prices of raw materials and labor, as well as addition/reduction of projects, making them subject to inherent risks of complexity. As there is a certain degree of subjectivity in these estimates, the calculation of the percentage of revenue from the completion of some projects may have errors or have a significant impact on the misinterpretation of revenue in each period. Therefore, the total estimated

cost for project contracts is a material estimate and judgement of the Company, hence it is considered a key audit item. For accounting policies and disclosure information relevant to the recognition of project income, see Notes 4, 5 and 27 to the financial statements.

For the above key audit matters, the audit procedures we performed are as follows:

- 1. To understand and test the Company's internal control procedures relevant to the preparation of the estimated total project cost.
- 2. To select samples and examine the documents of the Company's projects to confirm the reasonableness of the estimated total project cost.

Property, plant and equipment impairment

As of December 31, 2021, the carrying value of the Group's property, plant and equipment was NTD 2,568,926,000, accounting for 24% of total assets, which was significant. For accounting policies and related disclosures on asset impairment assessment, please refer to Notes 4, 5 and 15 on the consolidated financial report.

The Group's Tainergy Tech. Group is mainly engaged in the research, design, manufacturing and sales of solar cells, modules and related systems. In 2021, some equipment of the subsidiary VIETNERGY COMPANY LIMITED was idled due to adjustments to operations. Management expected that future economic benefits of equipment, plant and equipment will reduce, resulting in the recoverable being less than the book value. The recognized impairment losses in 2021 was NTD 312,976,000.

Management evaluated the recoverable amount of the property, plant and equipment impairment mentioned above based on the model of fair value less cost to sell, while referring to the adoption of the opinions in the expert's report as the basis. As the method and key assumption parameters used in the evaluation of the expert's valuation report have a high degree of professional judgment, the evaluation of property, plant and equipment impairment is listed as a key audit item.

Our principal audit procedures for the above description include:

- 1. To understand management's process and approval process in evaluating the provision of impairment for property, plant and equipment.
- 2. We evaluated the professional experience, suitability and independence of the independent valuation experts appointed by management and verified the qualifications of the independent valuation experts. We also adopted our financial advisors to assist in the evaluation of the appropriateness of the methods and assumptions used by the independent valuation experts in the evaluation of fair value.
- 3. We have used our financial advisors to assist in sampling parameters and historic information or external information used by the independent valuation experts to ensure the reasonableness of the valuation parameters used.

Other matters

For the separate financial statements prepared by Kenmec Mechanical Engineering Co., Ltd. in 2021 and 2020, we had an independent auditors' report issued with an unqualified opinion for reference.

Responsibility of the management and governance unit for the consolidated financial statements

Management was responsible for preparation of the consolidated financial statements with fair presentation in accordance with the Regulations Governing the Preparation of Financial Reports by Securities Issuers and the International Financial Reporting Standards, International Accounting Standards, interpretations and the statements of interpretation approved and released by the Financial Supervisory Commission and maintaining the necessary internal control related to preparation of the consolidated financial statements to ensure that the consolidated financial statements were free of material misstatement due to fraud or errors.

During preparation of the consolidated financial statements, management was also responsible for evaluating Kenmec Group's ability as a going concern, disclosure of relevant matters, and application of the going concern basis of accounting unless management intended to make Kenmec Group enter into liquidation or terminate its operations, or there were no other actual or feasible solutions other than liquidation or termination of its operations.

Kenmec Group's governance unit (including the Audit Committee) was responsible for supervising the financial reporting procedures.

CPA's responsibility for the audit of the consolidated financial statements

We audited the consolidated financial statements for the purpose of obtaining reasonable assurance about whether the consolidated financial statements were free of material misstatement due to fraud or error and issuing an audit report. Reasonable assurance refers to a high level of assurance. However, we could not guarantee the detection of all material misstatements in the consolidated financial statements with the audit conducted based on the generally accepted auditing standards. The misstatements might be due to fraud or error. If the individual or total amount misstated was reasonably expected to have an impact on the economic decision-making of the users of the consolidated financial statements, the misstatement was deemed material.

We used our professional judgment to be skeptical during the audit conducted based on the generally accepted auditing standards. We also performed the following works:

- 1. We identified and assessed the risk of any misstatement in the consolidated financial statements due to fraud or errors, designed and implemented response measures suitable for the evaluated risks, and acquired sufficient and appropriate audit evidence to use as the basis of our audit opinions. Fraud may involve collusion, forgery, omission on purpose, fraudulent statements or violation of internal control, and we did not find that the risk of material misstatement due to fraud was higher than the same due to error.
- 2. We understood the internal control related to the audit to an extent necessary to design audit procedures applicable to the current circumstances. However, the purpose of such work was not to express opinions regarding the effectiveness of Kenmec Group's internal control.
- 3. We evaluated the appropriateness of the accounting policies adopted by management and the rationality of the accounting estimates and relevant disclosure made by management.
- 4. We drew a conclusion about the appropriateness of the application of the going concern basis of accounting by management and whether the event or circumstances which might cause major doubts about Kenmec Group's ability as a going concern had a material uncertainty. If any material uncertainty was deemed to exist in such event or circumstance, we must provide a reminder in the audit report for the users of the consolidated financial statements to pay attention to the relevant disclosures therein, or amend our audit opinions when such disclosures were inappropriate. Our conclusion was drawn based on the audit evidence acquired as of the date of this audit report. However, future events or circumstances might result in a situation where Kenmec Group, would no longer have its ability as a going concern.
- 5. We evaluated the overall presentation, structure, and contents of the consolidated financial statements (including the relevant notes) and whether the consolidated financial statements presented relevant transactions and events fairly.
- 6. We acquired sufficient and appropriate audit evidence for the financial information of the entities forming the Group to provide opinions regarding the consolidated financial statements. We were responsible for instruction, supervision and conduct of the Group's audit cases, as well as the expression of the audit opinions for the Group.

The matters for which we communicated with the governance unit include the planned audit scope and time, as well as major audit findings (including the significant deficiencies of the internal control identified during the audit).

We also provided a declaration of independence to the governance unit, which assured that we complied with the requirements related to independence in the Norm of Professional Ethics for

Certified Public Accountant, and communicated all relationships and other matters (including relevant protective measures) which we deemed to be likely to cause an impact on the independence of CPAs to the governance unit.

We determined the key audit matters to be audited in Kenmec Group consolidated financial statements in 2021 based on the matters communicated with the governance unit. We specified such matters in the audit report except when public disclosure of certain matters was prohibited by related laws or regulations, or when, in very exceptional circumstances, we determined not to cover such matters in the audit report as we could reasonably expect that the negative impact of the coverage would be greater than the public interest brought thereby.

Chairman: Manager: Accounting Manager: CHING-FU HSIEH CHING-FU HSIEH CHIN-I LAI

Kenmec Mechanical Engineering Co., Ltd. and Subsidiaries Notes to Consolidated Financial Statements January 1 to December 31, 2021 and 2020 (All amounts are in NTD thousand unless otherwise specified.)

I. <u>Company milestones</u>

KENMEC MECHANICAL ENGINEERING CO., LTD. (hereinafter referred to as the Company) was established in July 1976 focusing on the design, machining, manufacturing and trading of industrial machines and steel angle frames; import and export of machinery, hardware, office equipment, and electric machinery; machining, manufacturing and trading of transfer lines, robot production lines, flexible manufacturing systems, automatic conveyors, automatic pallet stackers, automatic warehousing equipment, unmanned trucks, and robotic arms; manufacturing, machining and trading of computer and optical communication products and their components; agent of domestic and foreign manufacturers for manufacturing, trading, quoting and bidding of the aforementioned products.

The Company has traded on Taipei Exchange as of January 23, 2002.

The consolidated financial report is expressed in New Taiwan dollars, the functional currency of the Company.

II. Approval date and procedures of the financial report

The consolidated financial reports were approved at the Board meeting on March 18, 022.

III. Application of new and amended standards and interpretation

(I) The International Financial Reporting Standards (IFRS), International Accounting Standards (IAS), interpretations (IFRIC) and the statements of interpretation (SIC) (hereinafter collectively referred to as "IFRSs") approved and released by the Financial Supervisory Commission (hereinafter referred to as "FSC") are applied for the first time.

The Company expected no material changes to the accounting policies of the Group after adopting the amended IFRSs approved and released by the FSC.

(II) FSC-approved IFRSs to be applied in 2022

New/Amended/Revised Standards and Interpretation	Effective Date per IASB
"Annual improvements – 2018-2020 cycle"	January 1, 2022 (Note 1)
Amendments to IFRS 3, "Reference to the Conceptual	
Framework"	January 1, 2022 (Note 2)
Amendments to IAS 16, "Property, Plant and	January 1, 2022 (Note 3)
Equipment: Proceeds before Intended Use"	
Amendments to IAS 37, "Onerous Contracts – Cost of	January 1, 2022 (Note 4)
Fulfilling a Contract"	

- Note 1: The amendment to IFRS 9 will be applied to the exchange of financial liabilities or provision amendment occurred during annual reporting periods beginning on or after January 1, 2022. The amendment to IAS 41 "Agriculture" will be applied to fair value measurement during annual reporting periods beginning on or after January 1, 2022. The amendment to IFRS 1 "First-time Adoption of IFRSs" will be retrospectively applied to annual reporting periods beginning on or after January 1, 2022.
- Note 2: The amendment will be applied to business mergers with an acquisition date during annual reporting periods beginning on or after January 1, 2022.

- Note 3: The amendment is applied to the plants, property and equipment in the location and condition necessary to achieve the operation as expected by management after January 1, 2021.
- Note 4: The amendment will be applied to the contracts in which all the obligations have not been performed on January 1, 2022.

Amendments to IAS 16, "Property, Plant and Equipment: Proceeds before Intended Use"

The amendment stipulates that it is inappropriate that the sale proceeds of the items developed in order to bring property, plant and equipment to the location and condition necessary to meet the operation as expected by management are stated as a deduction from the cost of the assets. The items mentioned above shall be measured based on IAS 2 "Inventory," and the sale proceeds and costs of such items shall be recognized as profit or loss according to the applicable standards.

The amendment is applied to the plants, property and equipment in the location and condition necessary to achieve the operation as expected by management after January 1, 2021. If the Group adopts the amendment for the first time, the information related to the comparative periods shall be restated.

Upon initial adoption of the amendment, the estimated effects in 2021 are as follows:

		Adjustments for	
		initial	Book value after
	Book value	application	adjustment
Effects of assets, liabilities			
and equity			
<u>December 31, 2021</u>			
Property, plant and			
equipment	<u>\$ 1,226,278</u>	(\$ 40,985)	<u>\$ 1,185,293</u>
Effects of assets	<u>\$ 1,226,278</u>	(<u>\$ 40,985</u>)	<u>\$ 1,185,293</u>
Retained earnings	(\$ 1,343,276)	(\$ 22,710)	(\$ 1,365,986)
Non-controlling equity	112,526	(18,275)	94,251
Effects of equity	(<u>\$ 1,230,750</u>)	(\$ 40,985)	(\$1,271,735)
January 1, 2021			
Property, plant and			
equipment	\$ 1,807,941	(\$ 21,535)	<u>\$ 1,786,406</u>
Effects of assets	<u>\$ 1,807,941</u>	(\$ 21,535)	<u>\$ 1,786,406</u>

(Next page)

Total comprehensive income effect is attributable to: The owner of the Company	(\$ 827,609)	(\$ 22,937)	(\$ 850,546)
Non-controlling equity	$(\frac{65,116}{\$ 892,725})$	((83,574) $(934,120)$
Effect of 2021 cash flow Net cash inflow (outflow)			
from operating activities	(\$ 837,458)	(\$ 43,072)	(\$ 880,530)
Net cash inflow (outflow) from investing activities Net increase (decrease) in cash and cash	275,140	43,072	318,212
equivalents	(\$ 562,318)	<u>\$</u>	(\$ 562,318)

Except for the above-mentioned effects, up to the approval and release date of the consolidated financial reports, the Company assessed that the effects of the amendments to other standards and interpretations will not have a material impact on the financial position and financial performance.

(III) IFRSs issued by the IASB but not yet approved and released by the FSC

7 11	Effective Date per IASB
New/Amended/Revised Standards and Interpretation	(Note 1)
Amendments to IFRS 10 and IAS 28, "Sale or	Undetermined
Contribution of Assets between an Investor and	
their Associate or Joint Venture"	
IFRS 17 "Insurance Contracts"	January 1, 2023
Amendments to IFRS 17	January 1, 2023
Amendments to IFRS 17, "Initial application of IFRS	January 1, 2023
17 and IFRS 9 – Comparative Information"	
Amendments to IAS 1, "Classification of Liabilities as	January 1, 2023
Current or Non-current"	
Amendments to IAS 1, "Disclosure of Accounting	January 1, 2023 (Note 2)
Policies"	
Amendments to IAS 8, "Definition of Accounting	January 1, 2023 (Note 3)
Estimates"	
Amendment to IAS 12, "Deferred Tax related to	January 1, 2023 (Note 4)
Assets and Liabilities arising from a Single	
Transaction"	

- Note 1: Unless otherwise specified, the above-mentioned new/amended/revised standards or interpretation shall become effective in the annual reporting periods beginning on or after each effective date for such standards or interpretation.
- Note 2: The amendment will be prospectively applied to annual reporting periods beginning on or after January 1, 2023.
- Note 3: The amendment will be applied to the changes in accounting estimates and accounting policies during annual reporting periods beginning on or after January 1, 2023.
- Note 4: The amendments apply to transactions that occur after January 1, 2022, except for the recognition of deferred tax for all temporary differences related to leases and decommissioning obligations as of January 1, 2022.
- 1. Amendments to IAS 1, "Classification of Liabilities as Current or Non-current"

 The amendment specifies that when determining whether liabilities are classified as non-current liabilities, it shall be assessed whether the Group, at the end of a reporting period, has a right to extend the due date of the liabilities by at least 12 months after the reporting period. If the Group has such right at the end of the reporting period, the liabilities are classified as non-current liabilities no matter whether the Group is expected to exercise the right. The amendment clarifies that if the Group shall complete certain requirements to have the right to defer the settlement of liabilities, the Group must have followed the requirements before the end of a reporting period; the same shall apply even if the lender checks the Group's compliance with such requirements on a later date.

The amendment regulates that, for the purpose of liability classification, the aforementioned settlement of liabilities refers to a transfer of cash, other economic resources or the Group's equity instruments to the counterpart to eliminate the liabilities. However, if the terms and conditions of liabilities may, at the option of the counterparty, result in settlement of the liabilities by the transfer of the Group's equity instruments, and the option is recognized as equity separately in accordance with IAS 32 "Financial Instruments: Presentation," the aforementioned terms and conditions do not affect the classification of the liabilities.

2. Amendments to IAS 1, "Disclosure of Accounting Policies"

The amendments require the Group to determine the significant accounting policy information to be disclosed according to the definition of materiality. If the accounting policy information is reasonably expected to have an impact on the decision made by the main user of general-purpose financial statements who uses these financial statements to make such decision, the accounting policy information is deemed material. The amendments also clarify the following:

- The accounting policy information related to insignificant transactions or other matters or circumstances is not material and the Group is not required to disclose this accounting policy.
- The Group may make judgment according to the nature of a transaction or other matters or circumstances and determine that related accounting policy information is material, even if the amount is insignificant.
- The accounting policy information not related to significant transactions or other matters or circumstances is material.

In addition, the amendments give an example to explain that the accounting policy information related to significant transactions or other matters or circumstances may be material in the following cases:

- (1) The Group changes the accounting policy during the reporting period and the change leads to material changes of the information in the financial statements;
- (2) The Group selects applicable accounting policies from the options allowed in the Standards;
- (3) In case there is no specific standards to follow, the Group adopts the accounting policies established according to IAS 8 "Accounting Policies, Changes in Accounting Estimates and Errors";
- (4) the Group discloses the accounting policies that are determined using significant judgments or assumptions; or
- (5) Complicated accounting treatment rules are involved and the user of the financial statements relies on the information to understand significant transactions or other matters or circumstances.

3. Amendments to IAS 8, "Definition of Accounting Estimates"

The amendments define accounting estimates as the currency amount affected by measurement uncertainty in the financial statements. When applying accounting policies, the Group may need to measure the items in the financial statements using the currency amount that cannot be observed directly and must be estimated. When measuring the effect of the changes in technique or input value on accounting estimates, they shall be the changes in accounting estimates if they are not the correction of the previous errors.

Except for the above-mentioned effects, up to the approval and release date of the consolidated financial reports, the Group assesses the effects of the amendments to

other standards and interpretations on the financial position and performance on a continuous basis. The relevant effects are disclosed after the assessment.

IV. Summary of significant accounting policies

(I) Statement of compliance

The consolidated financial report was prepared in accordance with the Regulations Governing the Preparation of Financial Reports by Securities Issuers and the IFRSs approved and released by the FSC.

(II) Basis for preparation

Except for the financial instruments measured at fair value and the net defined benefit liabilities recognized at the present value of defined benefit obligations less the fair value of the planned assets, the consolidated financial reports were prepared on the basis of historical cost.

Fair value measurements are classified into Levels 1, 2, and 3 based on the degree to which an input is observable and the significance of the input:

- 1. Level 1 inputs: refer to quoted prices in an active market for identical assets or liabilities that are accessible on the measurement date (before adjustment).
- 2. Level 2 inputs: refer to the inputs, other than the quoted prices included in Level 1, that are observable for assets or liabilities directly (namely, the price) or indirectly (namely, presumed from the price).
- 3. Level 3 inputs: refer to the inputs that are not observable for assets or liabilities.
- (III) Classification of current and non-current assets and liabilities

Current assets include:

- 1. assets held mainly for the purpose of trading;
- 2. assets expected to be realized within 12 months after the balance sheet date; and
- 3. cash or cash equivalents (excluding those that are restricted for being used for exchange or settlement of liabilities within 12 months after the balance sheet date). Current liabilities include:
- 1. liabilities held mainly for the purpose of trading;
- 2. liabilities to be settled within 12 months after the balance sheet date, (irrelevant whether any long-term re-financing or payment re-arrangement agreement has been completed after the balance sheet date and before the date of release of financial reports; such liabilities are still current liabilities); and
- 3. liabilities whose due date cannot be unconditionally extended by more than 12 months after the balance sheet date. However, the terms and conditions of the liabilities that may, at the option of the counterparty, result in settlement of the liabilities by issuance of equity instruments do not affect the classification of liabilities.

Assets or liabilities that are not the above-mentioned current assets or current liabilities are classified as non-current assets or non-current liabilities.

The Group engages in the construction projects with an operating cycle longer than one year. Therefore, the assets and liabilities related to the constructions are classified as current or non-current based on the normal operating cycle.

(IV) Basis for consolidation

The consolidated financial report are financial reports including the Company and the entities controlled (subsidiaries, including structured entities). The operating profits and losses of acquired or disposed subsidiaries from the acquisition date to the disposal date in the current period are included in the consolidated statement of comprehensive income. The financial reports of the subsidiaries are adjusted to have their accounting policies consistent with those of the Group. All the transactions, account balances, profits, and expenses/losses between entities are eliminated during

preparation of the consolidated financial report. The total comprehensive income of the subsidiaries is attributable to the owner of the Company and the non-controlling equity even though this results in the non-controlling equity having a deficit balance.

Changes to the Group's equity ownership in the subsidiaries are treated as equity transactions if the changes do not result in loss of control. The book values of the Group and the non-controlling equity are adjusted to reflect the changes in their relative equity in the subsidiaries. The difference between the adjusted amount of the non-controlling equity and the fair value of any paid or received consideration is directly recognized as equity and attributable to the owner of the Company.

For the subsidiaries' details, shareholding ratios, and business operations, please refer to Note 13 and Table 8 and 9.

(V) Foreign currency

During preparation of each entity's financial reports, transactions using currencies other than the entity's functional currency (foreign currencies) are stated in the functional currency at the exchange rate on the date of transaction.

Monetary foreign currency items are translated at the closing exchange rate on each balance sheet date. Exchange differences arising from settlement or translation of the monetary items are recognized as profit or loss in the current period.

Non-monetary foreign currency items measured at fair value are translated at the exchange rate on the date of determining the fair value, and the exchange differences resulting therefrom are recognized as profit or loss in the current period. However, when changes in the fair value are recognized as other comprehensive income, the exchange differences arising therefrom are stated as the same.

Non-monetary foreign currency items measured at historical cost are translated at the exchange rate on the date of transaction and are not retranslated.

During preparation of the consolidated financial reports, the assets and liabilities of foreign operations (including the subsidiaries, associates, joint ventures or branches with countries in which they operate or currencies they use different from those of the Company) are translated into NTD at the exchange rate on each balance sheet date. Their profit and expense/loss items were translated at the average exchange rate of the period, and the exchange differences resulting therefrom were recognized in other comprehensive income (and attributable respectively to the owner of the Company and the non-controlling equity).

If the Group disposes all the interests of foreign operations or disposes their partial interest in a subsidiary and lose the control thereover, or the retained equity interest after disposal of the joint agreements or associates of the foreign operations is stated as financial assets and treated with the same accounting policy as the one for financial instruments, all the accumulated exchange differences attributable to the owner of the Group and related to the foreign operations are reclassified as profit or loss.

When partial disposal of the subsidiary of the foreign operations does not lead to loss of control, any accumulated exchange differences are re-attributed in proportion to the subsidiary's non-controlling equity but not recognized as profit or loss. For any other partial disposal of foreign operations, any accumulated exchange differences are reclassified as profit or loss based on the proportion of the disposal.

(VI) Inventory

Inventory includes raw materials, materials, finished goods work in process, and real estate held for sale. The inventory is measured based on the lower of the cost or net realizable value. The cost and the net realizable value are compared on the basis of the individual items except for the inventories of the same type. Net realizable value

refers to the estimated selling price in a normal situation less the estimated cost needed to complete the work and the estimated cost needed to complete the sale. The weighted average method is used to calculate the inventory cost.

(VII) Investment in associates

An associate refers to a company over which the Group has a significant influence, but it is not a subsidiary or joint venture.

The Group adopts the equity method for investment in associates.

Under the equity method, the investment in associates is initially recognized at its costs, and the amount of increase or decrease in the book value of such investment after the date of acquisition depends on the Group's shares of profit/loss and other comprehensive income in the associates and joint ventures and the distributed profits. In addition, changes to the Group's equity in the associates are recognized based on our shareholding ratio.

When the acquisition cost exceeds the Group's shares of the net fair value of the associates' identifiable assets and liabilities on the date of acquisition, such excess is recognized in goodwill which is included in the book value of such investment and may not be amortized; when the Group's shares of the net fair value of the associates' identifiable assets and liabilities on the date of acquisition exceed the acquisition cost, such excess is recognized in profit/loss of the period.

When the Group does not subscribe for new shares issued by the associates based on our shareholding ratio, resulting in changes to the shareholding ratio and consequently to the net equity value of investment, these changes are used for adjustment of the capital reserve – changes in the net equity of associates and joint ventures recognized under the equity method and the investments under the equity method. However, if subscription or acquisition of the shares is not based on the shareholding ratio, leading to a decrease in the Group's ownership equity in the associates, the amounts related to the associate in other comprehensive income are reclassified according to the percentage of such decrease and treated with the same accounting treatment basis as the one which the associates' direct disposal of relevant assets or liabilities shall be in accordance with. If the said adjustment shall be debited to capital reserves, and the balance of capital reserves arising from investment under the equity method is insufficient to be offset, the difference is debited to retained earnings.

When the Group's shares of losses in the associates are equal to or exceeded our equity in the associates (including the book value of investment in the associate under the equity method and other long-term equities that in nature are part of the net investment portfolio made by the Group in the associate concerned), we do not recognize further losses. The Group recognizes additional losses and liabilities only when any legal obligation or constructive obligation is incurred or the Group made payment on behalf of the associates.

For impairment evaluation, the Group examines the entire investment book value (including goodwill) for impairment as a single asset by comparing the recoverable amount and book value of the investment. Any recognized impairment loss is not allocated to any assets forming any part of the book value of the investment, including goodwill. Any reversal of the impairment loss is recognized to the extent of a subsequently increase in the recoverable amount of the investment.

The profit or loss generated from the upstream, downstream and side stream transactions between the Group and the associates is recognized in the consolidated financial reports only when such profit or loss is irrelevant to the Group's equity in the associates.

(VIII) Property, plant and equipment

The property, plant and equipment are recognized in accordance with the cost and subsequently measured based on the cost net of accumulated depreciation and impairment losses.

The property, plant and equipment under construction are recognized based on the cost net of accumulated impairment losses. The cost included professional service fees and the loan costs eligible for capitalization. Once the assets are completed and ready for their intended use, the assets are classified as appropriate items under property, plant and equipment, and the depreciation of the assets starts.

Except for the self-owned land, each significant part of the property, plant and equipment is separately depreciated on the straight-line basis over its useful life. The Group reviews the estimated useful life, residual value and method of depreciation at least on the end day of each year. and prospectively recognize the effect from changes in accounting estimates.

For derecognition of the property, plant and equipment, the difference between the net disposal proceeds and the asset book value is recognized as profit or loss.

(IX) Investment property

An investment property refers to a property held for earning rent income or for capital appreciation, or both. Investment property includes the land held without a definite purpose of use.

The investment property for internal use was initially measured based on the cost (including transaction cost) and subsequently measured based on the cost net of accumulated depreciation and accumulated impairment losses.

All the investment properties were depreciated on the straight-line basis.

For derecognition of the investment property, the difference between the net disposal proceeds and the asset book value was recognized in profit or loss

(X) Intangible assets

1. Acquired separately

Intangible assets with limited useful life acquired separately are initially measured in accordance with the cost and subsequently based on the cost net of accumulated amortization and impairment losses. Intangible assets are amortized on the straight-line basis over its useful life, the Group reviews the estimated useful life, residual value and method of amortization at least on the end day of each year and prospectively recognizes the effect from changes in accounting estimates. Intangible assets with indefinite useful life are recognized based on the cost net of accumulated impairment losses.

2. Derecognition

For derecognition of the intangible assets, the difference between the net disposal proceeds and the asset book value is recognized as profit or loss of the period.

(XI) Impairments of property, plant and equipment, right-of-use assets, intangible assets (excluding goodwill), and contract cost related assets

The Group assesses whether there are any signs indicating that any property, plant and equipment, right-of-use assets, and intangible assets (excluding goodwill) may be impaired on each balance sheet date. If there is any of such signs, the recoverable amount of the assets is estimated. When the recoverable amount of individual assets cannot be estimated, the Group estimates the recoverable amount of the cash-generating unit to which the assets belong. Corporate assets are amortized on a reasonable and consistent basis to the smallest group of cash-generating units

Intangible assets with indefinite useful life and intangible assets not yet available for use are tested for impairment at least annually or when there is any sign of impairment.

The recoverable amount is the higher of the fair value less costs of sale and the value in use. When the recoverable amount of any individual assets or cash-generating units is less than the book value, the book value of the individual assets or cash-generating units is adjusted down to the recoverable amount, and the impairment loss is recognized as profit or loss.

The impairment for the inventory, property, plant and equipment as well as intangible assets recognized due to customer contrasts is first recognized in accordance with the inventory impairment regulations and the aforesaid requirements. The excess of the book value of contract cost-related assets over the consideration that can be received for providing relevant goods or services net of relevant direct costs is recognized as impairment losses thereafter. The book value of the contract cost-related assets is then included in the cash-generating unit to which the assets belong in order to perform impairment assessment for the cash-generating unit.

When the impairment loss is reversed subsequently, the book value of the asset, cash-generating unit or contract cost-related assets is adjusted up to the revised recoverable amount. However, the increased book value does not exceed the book value (less the amortization or depreciation) determined under the circumstance that the impairment loss of the assets, cash-generating unit or contract cost-related assets is not recognized in the previous year. The reversal of the impairment loss is recognized as profit or loss.

(XII) Non-current assets held for sale

If the book value of non-current assets is to be recovered mainly through sale transactions rather than through continuing use, they are classified as held for sale. Non-current assets qualified for the classification must be available for immediate sale in the current condition and must be very likely to be sold. When management at an appropriate level guarantees to sell the assets, and the sale transaction is to be completed within one year from the date of classification, they are very likely to be sold.

Non-current assets classified as held-for-sale are measured at the lower of the book value and the fair value net of sale costs, in which case the depreciation of such assets stops.

(XIII) Financial instruments

Financial assets and financial liabilities are recognized in the consolidated balance sheet when the Group becomes a party of the financial instrument contract.

For initial recognition of the financial assets and financial liabilities, when the financial assets or financial liabilities are not measured at fair value through profit or loss, the assets or liabilities are measured at the fair value plus any transaction cost directly attributable to acquisition or issuance of the financial assets or financial liabilities. Any transaction cost measured at fair value through profit or loss directly attributable to the acquisition or issuance of the financial assets or financial liabilities is immediately recognized as profit or loss.

1. Financial assets

The regular transactions of financial assets are recognized and derecognized based on the accounting on the transaction date.

(1) Type of measurements

The financial assets held by the Group are those measured at fair value through profit or loss and at amortized cost as well as investment in equity instruments measured at fair value through other comprehensive income.

A. Financial assets measured at fair value through profit or loss

Financial assets measured at fair value through profit or loss are mandatorily to be measured at fair value through profit and loss. The financial assets mandatorily measured at fair value through profit and loss include the investment in equity instruments that are not designated to be measured at fair value through other comprehensive income, and the investment in liability instruments that are not qualified to be classified as those measured at amortized cost or measured at fair value through other comprehensive income.

The financial assets measured at fair value through profit or loss are measured at fair value. The produced dividend and interest are recognized in other income and interest income, respectively. The profit or loss generated from remeasurement is recognized in other profit or loss. For determination of the fair value, please refer to Note 38.

B. Financial assets measured at amortized cost

When the Group's invested financial assets meet both of the following two conditions, they are classified as financial assets measured at amortized cost:

- a. The financial assets held under a business model with the purpose of holding these assets to collect contractual cash flows; and
- b. The contractual terms generate cash flows on a specific date that are solely payments of principal and interest.

After the initial recognition, the financial assets measured at amortized cost (including cash and cash equivalents, accounts receivable measured at amortized cost) are measured based on the amortized cost equal to the total book value determined under the effective interest method less any impairment losses, and any profit or loss from foreign currency translation is recognized as profit or loss.

Except for the following two circumstances, the interest income is calculated as the effective interest rate times the total book value of financial assets:

- a. a. For purchased or originated credit-impaired financial assets, the interest income is calculated as the credit-adjusted effective interest rate times the amortized cost of the financial assets.
- b. For financial assets originally not purchased or originated credit-impaired but subsequently becoming credit-impaired, the interest income is calculated as the effective interest rate times the amortized cost of the financial assets in the next reporting period after the credit impairment.

Credit-impaired financial assets represent significant financial difficulties confronting the issuer or debtor, default, the circumstance that the debtor is likely to file for bankruptcy or other financial reorganization, or that the active market of financial assets disappears due to financial difficulties.

Cash equivalents include highly liquid time deposits that can be converted into defined amounts of cash at any time within 3 months

after the date of acquisition and are subject to an insignificant risk of changes in value, and are used to meet short-term cash commitments.

C. Investment in equity instruments measured at fair value through other comprehensive income

At initial recognition, the Group may make an irrevocable election to designate the investment in equity instruments held not for trading and not recognized by the acquirer in a business merger or with consideration to be measured at fair value through other comprehensive income.

Investment in equity instruments measured at fair value through other comprehensive income is measured at fair value. Subsequent changes in the fair value are recognized in other comprehensive income and accumulated in other equity. For disposal of the investment, any cumulative profits or losses are directly transferred to retained earnings and not reclassified as profit or loss.

After the Group's right to receive dividends is determined, the dividends of investment in equity instruments measured at fair value through other comprehensive income are recognized in profit or loss except that such dividends apparently represent a partial return of the investment cost.

(2) Impairment of financial and contractual assets

The Group assesses impairment losses on the financial assets (including accounts receivable) measured according to amortized cost based on the expected credit losses on each balance sheet date.

Loss allowances for accounts receivable and contract assets are recognized based on the lifetime-expected credit losses. The Company first assesses whether the credit risk on other financial assets significantly increases after the initial recognition. When the increase is not significant, the loss allowance for the financial assets is recognized based on the 12-month expected credit losses; when the increase is significant, it is recognized based on the lifetime-expected credit losses.

The expected credit losses are the average credit losses weighted by the risk of default. 12-month expected credit losses represent the expected credit losses on financial instruments from any potential default within 12 months after the reporting date. Lifetime-expected credit losses represent the expected credit losses on financial instruments from any potential default during the expected lifetime.

For the purpose of internal credit risk management, financial assets are deemed to be defaulted when the following circumstance occurred, without consideration of the collateral held:

- A. Any internal or external information indicates that a debtor is impossible to pay off the debts.
- B. Any payment is overdue more than 365 days, unless any reasonable and supportable information makes it appropriate to postpone the default criteria.

The impairment loss on all financial assets is deducted from the book value of the financial assets through allowance accounts. However, the loss allowance of the investment in liability instruments measured at fair value through other comprehensive income is recognized as other comprehensive income, and the book value thereof is not reduced.

(3) Derecognition of financial assets

The Group derecognizes financial assets only when the contractual rights to the cash flows from the assets become invalid, or the financial assets and almost all the risks and returns over the ownership of the financial assets are transferred to other companies.

For removal of the entire financial assets measured at amortized cost, the differences between the book value and the received consideration were recognized in profit or loss. Upon derecognition of the entire investment in liability instruments measured at fair value through other comprehensive income, the difference between its book value, and the total amount of the consideration received plus any cumulative gain or loss recognized as other comprehensive profit or loss is recognized as profit or loss. Upon derecognition of the entire investments in equity instruments measured at fair value through other comprehensive income, the cumulative gain or loss is directly transferred to retained earnings and not reclassified as profit or loss.

2. Equity instruments

The debt and equity instruments issued by the Group are classified as financial liabilities or equity based on the definition of real and financial liabilities as well as equity instruments under the terms and conditions of the contracts.

The equity instruments issued by the Group are recognized based on the payment net of the direct cost of issuance.

When a reacquired equity instrument is originally owned by the Company, the re-acquisition is recognized as a deduction from equity. Purchase, sale, issuance or cancellation of the equity instruments owned by the Company are not recognized as profit or loss.

3. Financial liabilities

(1) Subsequent measurement

All financial liabilities are measured at amortized cost under the effective interest method.

(2) Derecognition of financial liabilities

For derecognition of financial liabilities, the differences between the book value and the consideration paid (including any non-cash assets transferred and any liabilities assumed) are recognized as profit or loss.

4. Derivatives

The derivatives in the contract of the Group include forward exchange rate in order to manage the interest rate and exchange rate risk of the Group.

The derivatives are recognized initially at the fair value when the contract of derivatives is signed and subsequently remeasured at the fair value on the balance sheet date. Any profit or loss from the remeasurement is recognized as profit or loss directly. However, for derivatives that are designated as effective hedging instruments, the timing at which they are recognized as profit or loss depends on the underlying hedge arrangement. When the fair value of the derivatives is positive, they are classified as financial assets; when the fair value is negative, they are classified as financial liabilities.

If derivatives are embedded in the main contract of assets within the scope of IFRS 9 "Financial Instruments," the classification of financial assets is determined depending on the contract as a whole. If derivative instruments conforming to the definition of derivative instruments are embedded in a main

contract of assets not within the scope of IFRS 9 (e.g. a main contract of financial liabilities), and their risk and feature are not in close relation with the risk and feature of the main contract, and the hybrid contract is not measured at fair value through profit or loss, the embedded derivative instruments are deemed standalone derivative instruments.

(XIV) Liability reserve

The amount recognized as a liability reserve is the best estimate of the expenses needed to settle the obligation on the balance sheet date in consideration of the risks and uncertainty of the obligation. The liability reserves are measured based on the estimated discounted cash flow for settlement of the obligation.

1. Onerous contract

When the unavoidable cost for fulfillment of contractual obligations is expected to exceed the expected economic benefit from the contract, the present obligation deriving from the onerous contract is recognized as liability reserve.

2. Warranty

The warranty obligation to guarantee that products conform to the agreed specification is recognized based on the best estimate made by management for the expenses needed to settle the Group's obligation when the revenue of the relevant commodities is recognized.

(XV) Recognition of revenue

After the Group's recognition of performance obligations under a contract with customers, the Group allocates the transaction price to each performance obligation and recognizes the allocated amount as revenue after each performance obligation is fulfilled.

For the contract in which transfer of commodities or services and collection of considerations are conducted at an interval within 1 year, the transaction price is not adjusted for significant financing components.

1. Revenue from sale of commodities

Revenue from sale of commodities is generated from the sales of solar and electronic equipment products. Once the solar and electronic equipment products are delivered to the customer-designated location and accepted by the customer, the customer is entitled to the products' price determination and right of use, has the main responsibility to resell the products, and takes the risk that the products might become outdated. Therefore, the revenue and accounts receivable are recognized at that point of time. The receipts in advance from the sale are recognized as contract liabilities before the delivery of the products.

When export of raw materials for processing, the control over the ownership of processed products is not transferred, and thus the revenue for the export of raw materials is not recognized.

2. Service income

Service income derives from repair of equipment.

With provision of the equipment repair service from the Group, the customer acquires and consumes the benefit from performance of the contract. Related income is recognized when services are completely provided. Involvement of technicians is need for repair of equipment, the Group measures the progress of the work based on the percentage of the incurred man-hours in the estimated total man-hours. Since payment is made after completion of the repair as agreed in the contract, the Group recognizes the service income as contract assets when the service is provided and transfer it to account receivable when the repair is completed.

3. Project income

Since the cost of construction is directly related to the percentage of fulfillment of the contractual obligation, the Group measures the progress based on the percentage of the actually invested cost in the estimated total cost. the Group progressively recognizes contract assets during the construction and transfer them to accounts receivable when issuance of bills. If the construction project proceeds received exceed the revenue recognized, the difference is recognized as contract liabilities. Construction retainage retained by customers according to contractual terms and conditions is to ensure that the Group fulfills all the contractual obligation thereof and is recognized as contract assets before the fulfillment of the contract.

If the result of the fulfillment cannot be measured reliably, the contract income is recognized only within the scope of the actually incurred contract fulfillment cost expected to be recovered.

(XVI) Lease

The Group assesses whether an agreement is (or contained) a lease on the date of entering into the agreement.

1. The Group is the lessor

A lease is classified as finance leases when almost all the risks and returns attached to the ownership of assets are transferred to the lessee according to the terms and conditions, and all the other leases are classified as operating leases.

The lease payment under operating leases less lease incentives is recognized as profit on the straight-line basis over the lease term. The original direct cost generated from the acquisition of the operating leases plus the book value of underlying assets is recognized as expenses on the straight-line basis over the lease term. The lease agreement with the lessee is dealt with as a new lease from the effective date of lease modification.

When land and building are included as elements of a lease, the Group assesses if individual elements are classified as financial or operating lease based on whether almost all the risks and compensations attached to the ownership of these elements are transferred to the lessee. The lease payment is allocated to the land and building based on a relative proportion of the leasehold interest fair value of these land and building on the execution date of the contract. If the lease payment can be allocated to these two elements reliably, each of them is dealt with depending on the category it belongs. If the lease payment cannot be allocated to these two elements reliably, the overall lease is classified as financial lease; if these two elements obviously meet the criteria of operating lease, the overall lease is classified as operating lease.

2. The Group is the lessee

The lease payment from the leases of low-value underlying assets to which the exemption of recognition is applied and short-term lease is recognized as expenses on the straight-line basis over the lease term, while right-of-use assets and lease liabilities with respect to other leases are recognized on the lease commencement date.

The right-of-use assets are initially measured based on the cost (including the initial recognized amount of lease liabilities, the lease payment paid before the lease commencement date less the lease incentives received, the initial direct cost and the cost estimated to restore the underlying asset) and subsequently measured based on the cost net of accumulated depreciation and accumulated impairment losses, and then the remeasurement of the lease liabilities is adjusted. The right-of-use assets are separately presented in the consolidated balance sheet.

The right-of-use assets are depreciated on the straight-line basis over the period from the lease commencement date to the expiration of the useful life or the lease period, whichever is sooner.

The lease liabilities were initially measured based on the present value of lease payments (including fixed payments). If the interest rate implicit in a lease could be readily determined, the lease payments were discounted at the interest rate. When such interest rate cannot be readily determined, the lessee's incremental borrowing rate of interest is used.

Subsequently, the lease liabilities are measured at amortized cost under the effective interest method, and the interest expenses are amortized over the lease term. When any changes in the lease term, the amount to be paid under residual value guarantee, the assessment relating the purchase options of underlying assets, or the changes in the index or rate determining the lease payments cause the changes in the future lease payments, we remeasure the lease liabilities and adjust the right-of-use assets accordingly. However, the residual remeasurement is recognized in profit or loss when the book value of right-of-use assets is reduced to zero. For the lease modification not dealt with as a single lease, the remeasurement of the lease liabilities due to reduction of the lease scope is conducted to reduce the right-of-use assets and recognized in profit or loss in terms of termination of any part of all of the lease; the remeasurement of the lease liabilities due to other modifications is conducted for adjustment of the right-of-use assets. The lease liabilities are separately presented in the consolidated balance sheet.

(XVII) Cost of borrowing

The cost of borrowing that can be directly attributable to the assets for which acquisition, building or production meet the requirements is part of the cost of such assets until almost all the required activities for them to reach the intended status of use or sale are completed.

The income earned from temporary investment by using certain loans before the occurrence of capital expenses meeting the requirements is deducted from the cost of borrowing that meets the requirements of capitalization.

Otherwise, all the costs of borrowing are recognized as profit or loss in the year in which the borrowing occurred.

(XVIII) Government grants

The government grants shall only be recognized when it is reasonable to ensure that the Group will comply with the conditions incident to the government subsidies and the subsidies may be received affirmatively.

The government grant related revenues are recognized as profit or loss on a systematic basis within the period when the costs to be subsidized by the government are recognized as expenses by the Group. Government grants for which the acquisition of non-current assets in a purchase or building manner or in other manners by the Group is necessary are recognized as deferred income and transferred to profit or loss on a reasonable and systematic basis over the useful life of the relevant assets.

If the government grants are used to make up the expenses or losses that have occurred, or immediately support the finance of the Group and there is no future cost, such grants are recognized in profit or loss during the period when they can be received.

(XIX) Employee benefits

1. Short-term employee benefits

Liabilities related to employee benefits are measured at non-discounted amount expected to be paid against the services to be provided by the employees.

2. Retirement benefits

Every pension fund contributed under the defined pension appropriation plan is recognized as expenses during the period when employees provide services.

Defined retirement benefit costs (including servicing costs, net interest, and remeasurement) under the defined retirement benefit plan are calculated actuarially using the projected unit credit method. Service costs (including current and previous service costs) and net interest on net defined benefit liabilities (assets) were recognized in employee benefit expenses when they were incurred. Remeasurement (including actuarial profits or losses and return on plan assets net of interest) is recognized in other comprehensive income and presented in retained earnings when it occurs. It is not reclassified as profit or loss in the subsequent periods.

Net defined benefit liabilities (assets) represent the contribution deficit (surplus) in the defined retirement benefit plan. Net defined benefit assets shall not exceed the present value of contribution refunded from the defined retirement benefit plan or future deductible contribution.

(XX) Share-based payment arrangement

Employee stock options for employees

The employee stock options are recognized as expenses based on the fair value of equity instruments on the grant date and the best estimate of the vested amount on the straight-line basis over the vesting period, while the capital reserve – employee stock options is adjusted. If the amount is immediately vested on the grant date, it is recognized as expenses on that date. The Group may transfer treasury stocks to employees. The grant date is the date of notification to employees.

(XXI) Income tax

The income tax expenses are the total of current and deferred income taxes.

1. Current income tax

The Group determines the current revenue (loss) in accordance with the laws and regulations of the jurisdiction where the income tax returns are filed and, with this as a basis, calculates the income tax payable (receivable).

The additional income tax on undistributed earnings calculated according to the Income Tax Act of the Republic of China is recognized in the year when the related resolution is made at the shareholders' meeting.

The adjustments to the income tax payable in the previous year are recognized in the current income tax.

2. Deferred income tax

The deferred income taxes are calculated based on the temporary difference between the book value of assets and liabilities in the book and the tax base for calculation of taxable income.

Deferred income tax liabilities are generally recognized based on all taxable temporary differences; deferred income tax assets are recognized when we are likely to have taxable income available to offset the income tax arising from deductible temporary differences, loss carryforwards, purchase of machinery/equipment, R&D and talent training.

Taxable temporary differences generated from investment in subsidiaries, associates and joint arrangements are recognized in deferred income tax liabilities except where the Group can control the timing of reversal of the taxable temporary differences, and where such differences are not likely to be reversed in the foreseeable future. Deductible temporary differences related to such investment are recognized, to the extent that they are expected to be reversed in the foreseeable future, as deferred income tax assets only when we are likely to have taxable income adequate to realize the temporary differences.

The book value of deferred income tax assets is reviewed at each balance sheet date. When any of the deferred income tax assets is not likely to have taxable income adequate to return all or part of the assets anymore, the book value thereof is reduced. Those that are not originally recognized as deferred income tax assets are reviewed at each balance sheet date. When any of those is likely to generate taxable income adequate to return all or part of the assets in the future, the book value thereof is increased.

The deferred income tax assets and liabilities are measured at the tax rate of the period in which the liabilities or assets are expected to be settled or realized. The tax rate is subject to the tax rate and tax laws legislated or substantively legislated on the balance sheet date. The deferred income tax liabilities and assets are measured to reflect the tax on the balance sheet date arising from the method that the Group excepts to use to recover or settle the book value of the liabilities and assets.

3. Current and deferred income taxes

The current and deferred income taxes are recognized as profit or loss other than those related to the titles stated as other comprehensive income or as equity directly, which are recognized in other comprehensive income separately or in equity directly.

V. <u>Major sources of uncertainty of significant accounting judgments, estimates, and assumptions</u>

For adoption of the accounting policies, our management must make judgments, estimates and assumptions related to the information that cannot be readily acquired from other sources based on historical experience and other relevant factors. The actual results may differ from those estimates.

The Group will incorporate possible impacts of the COVID-19 outbreak on the economic environment into consideration of material accounting estimates for cash flow projects, growth rates, discount rates and profitability. Management will continue to review estimates and underlying assumptions. When the amendments to the estimates only affect the current period, they are recognized in the period in which they are made; when the amendments to the estimates affect the current and future periods at the same time, they are recognized in the period in which they are made and the future period.

Main sources of uncertainties of estimates, and assumptions

(I) Construction contracts

The construction profit or loss of a construction contract is recognized in revenue and cost with reference to the completion level of the contractual activities. The completion level is measured based on the percentage of the contract cost incurred to the completed works up to now in the estimated total contract cost. The amount of the variable consideration such as incentives and damages will be incorporated in the contract income only when, after subsequent elimination of related uncertainties, the amount of the accumulated income after the incorporation and recognition of such variable consideration will not likely lead to significant reversal.

Since the estimated total cost and contract items are derived by management from assessment and judgment of the nature of individual products, expected outsourcing price, project period, construction project, and construction method, they may affect the calculation of the completion percentage and construction profit/loss. (Please refer to Note 27.)

(II) Property, plant and equipment impairment

Impairment of solar cell-related equipment is evaluated based on the recoverable amount (the higher of the fair value of such asset less the cost of sale and its use value) of such asset. Market prices, estimated economic lives, capacity utilization rate or inprocess cost/replacement cost estimates and disposal costs will affect the recoverable amount of such asset, which is likely to result in additional recognition of impairment losses or reversal of impairment losses already recognized by the Group.

(I) As for the structured time deposit agreement entered into by the Group and banks, the structured time deposit includes an embedded derivative instrument not in a close relation to the main contract. Since the main contract included in the hybrid contract belongs to the assets within the scope of IFRS 9, the main contract shall be mandatorily classified as financial assets measured at fair value through profit or loss according to the overall assessment for the hybrid contract.

(II) The forward exchange contracts that were not subject to hedge accounting or mature on the balance sheet date are as follows:

December 31, 2020

	Currency	Maturity date	Contract price (NTD thousand)
Forward exchange contract			
purchase	USD : RMB USD : RMB	January 28, 2021 March 31, 2021	USD200/CNY1,349 USD300/CNY1,977
	USD: RMB	September 9, 2021	USD200/CNY1,336

(III) For information on pledges of financial instruments at fair value through profit or loss, please refer to Note 40.

Co., Ltd.	900	900
,	\$ 35,805	\$ 28,145

The Group invested in the common stocks of United Information System Service Co., Ltd. and Ecatch Automation Co., Ltd. according to our medium and long-term strategies and expected to gain profits through long-term investment. Since the Group's management deemed that the recognition of short-term changes in the investment's fair value in profit or loss was not consistent with the said long-term investment plan, they opted to have the investment measured at fair value through other comprehensive income.

(I) Notes and accounts receivable

The Group provides an O/A 30-to-90-day credit period on average for sale of commodities, and interest does not accrue on accounts receivable. When determining the recoverability of accounts receivable, the Group considers any changes in their credit quality from the original credit date to the balance sheet date. Since the historical experience tells that the accounts receivable overdue for more than 1 year are not recoverable, the Group recognizes the accounts receivable of more than 1 year in 100% loss allowance. As for the loss allowance of the accounts receivable within 1 year, the amount not recoverable is estimated with reference to the previous default record current financial status of the counterparty.

The Group recognizes the loss allowance for accounts receivable based on the lifetime expected credit losses. The lifetime expected credit losses are calculated using a provision matrix with consideration of customers' historical default records and current financial position, industrial and economic environments, GDP forecasts and industrial prospects. Since our historical experience of credit losses show no significant difference in the type of loss between different customers, the customers are not further classified in the provision matrix. We only set the expected credit loss rate based on the days overdue of accounts receivable.

When there is any evidence showing that the trading counterparty is facing serious financial difficulties and the Group cannot estimate a reasonable recoverable amount (for example, the trading counterparty is undergoing liquidation or any debt has been overdue for more than 365 days), the Group directly write off related accounts receivable, continue to claim for payment, and recognize the recovered amount therefrom in profit or loss.

The Group's loss allowance for notes and accounts receivable measured using the provision matrix are as follows:

December 31, 2021

	Not overdue	1 – 90 days overdue	91 – 180 days overdue	181 – 365 days overdue	More than 365 days overdue	Individual evaluation of impairment	Total
Percentage of expected credit losses	0%~56.45%	0% ~ 56.45%	6.58% ~ 38.43%	14.36%	100%	100%	
Total book value Loss allowance (lifetime expected	\$ 486,621	\$ 71,160	\$ 3,285	\$ 170	\$ -	\$ -	\$ 561,236
credit losses) Amortized cost	$(\frac{1,969}{\$ 484,652})$	$(\frac{947}{\$ 70,213})$	$(\frac{232}{\$ 3,053})$	$(\frac{24}{\$})$	<u>-</u>	<u>-</u>	$(\frac{3,172}{\$ 558,064})$

December 31, 2020

<u> </u>	Not overdue	Overdue 1-90 days	Overdue 91-180 days	Overdue 181-365 days	Overdue Over 365 days	Individual evaluation of impairment	Total
Percentage of							
expected credit losses	0% ~ 46.9%	2% ~ 75.04%	12% ~ 42.89%	13.22% ~ 100%	100%	100%	
Total book value	\$ 398,131	\$ 138,068	\$ 15,657	\$ 5,758	\$ 3,168	\$ 149	\$ 560,931
Loss allowance							
(lifetime expected							
credit losses)	(96)	(10,050)	(6,448)	(5,722_)	$(\underline{}3,168)$	(149)	(25,633)
Amortized cost	\$ 398,035	\$ 128,018	\$ 9,209	\$ 36	<u>s -</u>	<u>s -</u>	\$ 535,298

Changes in loss allowance for notes and accounts receivable and overdue receivables are as follows:

	2021	2020
Balance – beginning of the year	\$ 28,336	\$ 135,845
Add: Impairment loss		
appropriated in the year	6,119	-
Less:Impairment loss reversed		
in the year	-	(2,118)
Less:Actual amount written off		
in the year	(149)	(105,669)
Differences from translation of		
foreign currencies	(305)	<u> 278</u>
Balance – ending of the year	<u>\$ 34,001</u>	<u>\$ 28,336</u>

Due to customers entering into liquidation or not intending to collect debts, the Group wrote off NTD 105,669,000 of accounts receivable and non-accrual loans and NTD 105,669,000 of provision of loss.

(II) Other receivables

Interest does not accrue on other receivables. When determining the recoverability of other receivables, the Group considers any changes in their credit quality from the original credit date to the balance sheet date. Since the historical experience tells that other receivables overdue for more than 1 year are not recoverable, the Group recognizes other receivables of more than 1 year in 100% loss allowance. As for the loss allowance of other receivables within 1 year, the amount not recoverable is estimated with reference to the previous default record current financial status of the counterparty.

Changes in loss allowance for other receivables are as follows:

	Decemb	er 31, 2021	Decembe	er 31, 2020
Balance – beginning of the year	\$	422	\$	290
Add: Impairment loss				
appropriated in the year		-		269
Less: Impairment loss reversed				
in the year	(422)		-
Less: Actual amount written off				
in the year		<u>-</u>	(<u>137</u>)
Balance – ending of the year	\$	<u> </u>	\$	422

On December 31, 2021 and 2020, the Group did not have other receivables which were overdue and for which no loss allowance was recognized in the account.

XI. <u>Inventory</u>

	December 31, 2021	December 31, 2020	
Finished goods	\$ 100,822	\$ 92,243	
Work in process	79,200	63,176	
Raw material	279,222	70,566	
In-transit inventory	16,032	28,060	
Real estate held for sale.	539,922	1,530,490	
	\$ 1,015,198	\$ 1,784,535	

The cost of sales related to the inventories in 2021 and 2020 was NTD 3,867,260,000 and NTD 3,761,303,000, respectively.

The cost of sales related to the inventories in 2021 and 2020 included the following items:

	2021	2020
Gain from price recovery (loss) of inventory	(\$ 7,421)	\$ 26,577
Prepayment for purchase impairment reversal gain	13,288 \$ 5,867	12,659 \$ 39,236

The recovery gain of net realizable value of inventory in 2020 resulted from a rise in the sale prices of the inventory on certain markets.

Due to the requirements of the government's construction project, the Group's Kenmec Mecha-Tronics and Kenmec Technology (Suzhou) entered into a house demolition compensation agreement with the local government authority in March 2021. Hence, the assets levied by the government were reclassified to non-current assets held for sale.

The agreement was signed on March 29, 2021, by the Group's Kenmec Technology and Kenmec Mecha-Tronics, for a total consideration of RMB 123,840,000 and RMB 214,375,000, respectively. As of December 31, 2021, Kenmec Technology and Kenmec Mecha-Tronics has received RMB 37,000,000 and RMB 78,000,000, respectively, and paid demolition-related expenses of RMB 11,022,000 and RMB 8,388,000. Please refer to Note 22.

In the Board meeting held on October 22, 2021, the Group's Tainergy reported to the Board of Directors the disposal of the land use rights and plant of the subsidiary Tainergy Technology (Kunshan) located in China. It has been reclassified to non-current assets held for sale and presented separately in the consolidated balance sheet. Please refer to Note 41.

Remarks:

- 1. The Group has a direct and indirect shareholding of 27.19% in Tainergy and, nevertheless, has substantial control over the Group. It is thus incorporated as an entity of the Group. From September to December 2021, the Company did not increase capital according to its shareholding ratio, resulting in a decrease in shareholding ratio to 27.19%. Please refer to Note 35.
- 2. On January 20, 2021, the Group's Tainergy did not increase capital of Star Solar New Energy Co., Ltd. according to its shareholding ratio, resulting in a decrease in shareholding ratio from 100% to 35.71%, losing control over the company. The fair value of the remaining 35.71% equity at the disposal date was NTD 4,674,000, which was changed to an investment accounted for using the equity method. Please refer to Note 34.
- 3. In May 2021, the Company and the Group's Tainergy did not increase the capital of Taisic Materials according to their shareholding ratio, resulting to a decrease in their shareholding ratios to 8.60% and 55.41%, respectively. Please refer to Note 35 for changes in non-controlling equity.
- 4. Kunshan Jichang Energy Technology Co., Ltd. is located in Kunshan City, Jiangsu Province of the People's Republic of China and was established with a 100% capital investment by Tainergy Technology (Kunshan) Co., Ltd., one of the consolidated companies, in June 2020. The main business activity of Kunshan Jichang Energy Technology Co., Ltd. is the sale of solar power-related products. A capital of RMB 209,466,000 was expected to be contributed, but it has not yet been contributed as of December 31, 2021.
- 5. Located in Nangang District, Taipei City, Chief Global Logistics Co., Ltd. was established in August 2021, 100% funded by the Company, with a capital contribution of NTD 1,000,000. The company's main business is warehousing.
- 6. The Group acquired 100% of equity of Hua-Xia Construction Co., Ltd. on July 30, 2021. Please refer to Note 34.
- 7. The Group's share of profit or loss and other comprehensive income in Chief Global Logistics and Hua-Xia Construction are calculated according to the unaudited financial reports. However, management of the Company believes that the unaudited financial reports of the above investees will not have a material impact.
- 8. They are subsidiaries holding significant non-controlling equity: None.

(I) The utilization of the production capability of the Solar Cell Department of Vietnergy Co., Ltd. has been poor. The Group expected that the future economic benefits from the machinery and equipment used to produce such product would decrease. Hence the Group engaged an expert to evaluate the fair value of the equipment based on the use of the assets, and a recoverable amount of NTD 868,626,000 was calculated, which was less than the carrying amount. Therefore, an impairment loss of NTD 312,976,000 was recognized in 2021. The impairment loss was stated under other profits and losses in the consolidated statement of comprehensive income. The Group determined the recoverable amount of this machinery and equipment using fair value less costs of disposal. Related fair value was determined by the cost method, mainly assumed to be economic depletion, which is a Level 3 fair value measurement.

The Group's machines and equipment in Mainland China expected to be used for production were left idle. As a result, the recoverable amount of the machinery and equipment was lower than the book value. Therefore, an impairment loss of NTD

- 8,717,000 was recognized in 2021. The impairment loss was stated under other profits and losses in the consolidated statement of comprehensive income.
- (II) As assessed by the management of Kentec, an entity of the Group, the sales of some OEM products were poor on the market and, thus, the machine and equipment used for the production of these products lost their value of use. Hence, management recognized NTD 1,960,000 as annual impairment loss in 2020. The impairment loss was stated under other profits and losses in the consolidated statement of comprehensive income.
- (III) The Group anticipated that some other equipment had no use value and recognized an impairment loss of NTD 3,250,000 in 2020. The impairment loss was stated under other profits and losses in the consolidated statement of comprehensive income.

The depreciation expense was calculated on the straight-line basis over the following useful lives:

Land improvement	20 years
House and building	
Main factory building	20 to 50 years
Mechanical & electric power	
equipment	8-10 years
Engineering system	4-6 years
Machinery and equipment	
Solar power system	16 to 20 years
Auto warehouse equipment	16 years
Cleanroom equipment	6-12 years
Boiler equipment	6 to 8 years
SMT production line	6 to 9 years
Test equipment	6-10 years
Electricity transmission,	
distribution and	
transformer equipment	20 years
system and equipment	
construction	3 to 18 years
Solar power equipment	2-10 years
Machine tool/machinery	5-10 years
Instrument	3-8 years
Transport equipment	4-8 years
Other equipment	1-10 years

For the amount of the property, plant and equipment mortgaged as collateral for loans, please refer to Note 40.

XVI. Lease agreement

(I) Right-of-use assets

Disposal of right-of-use assets	(\$ 6,426)	(\$ 5,041)
Depreciation expense of right- of-use assets Land Building	\$ 4,453 30,848 \$ 35,301	\$ 4,654 <u>28,125</u> <u>\$ 32,779</u>
Capitalization of depreciation		
expenses	<u>\$ 8,257</u>	<u>\$</u>

The Board meeting held on October 22, 2021, resolved to dispose of land use rights and ground buildings of the Group's Tainergy Kunshan to Kunshan Changshunhong Energy Tech Co., Ltd. The disposal amount was RMB 177,299,000. NTD 53,233,000 of land use right of this land was reclassified to held for sale under non-current assets. Please refer to Note 12.

Due to the requirements of the government's construction project, the Group's Kenmec Mecha-Tronics and Kenmec Technology (Suzhou) entered into a house demolition compensation agreement with the local government authority in March 2021. Hence, NTD 22,942,000 of the use right of this land was reclassified under non-current assets held for sale. Please refer to Note 12.

The Group built equipment on the leased right-of-use asset. During construction, depreciation and interest expenses incurred were capitalized to repayment of equipment. For capitalization of interest expenses, please refer to Note 28.

For the right-of-use assets pledged as collateral for loans, please refer to Note 40.

(II) Lease liabilities

	December 31, 2021	December 31, 2020
Book value of lease liabilities		
Current	\$ 18,053	\$ 26,835
Non-current	333,821	84,046
	<u>\$ 351,874</u>	<u>\$ 110,881</u>

Range of discount rate for lease liabilities is as follows:

	December 31, 2021	December 31, 2020
Land	5.2%	5.2%
Building	1.68% ~ 5.49%	2.1% ~ 5.49%

(III) Important lease activities and terms

The Group also rents several land lots and buildings for plants and offices with a lease term of 1.25–20 years. After the termination of the lease period, the Group is not entitled to a bargain purchase option for the land and buildings rented.

(IV) Other lease information

For the contract of the Group to lease out investment property under operating lease, please refer to Note 17.

	2021	2020
Short-term lease and lease		
expense of low-value assets	<u>\$ 6,861</u>	<u>\$ 4,787</u>
Total cash (outflow) amount		
for lease	(<u>\$ 49,420</u>)	(\$ 21,528)

The Group opts to apply the exemption of recognition to the lease of property which is qualified as a short-term lease or a lease of low-value assets, and does not recognize right-of-use assets and lease liabilities with respect to such lease.

The Group had no rental commitments with a lease term commencing after the balance sheet date on both December 31, 2021 and 2020.

(I) Prepayment for purchase

The Group's prepayments for purchase were mainly the prepayments made according to the requirements of the material purchase contracts signed between Tainergy and Sino-American Silicon Products Inc..

As of December 31, 2021 and 2020, an accumulated impairment loss of NTD 166,969,000 and NTD 180,257,000 has been appropriated for the prepayment for purchase, respectively. Please refer to the description of Note 41.

A profit of NTD 13,288,000 and a loss of NTD 12,659,000 were recognized as a reduction of operating costs from prepayment for purchase impairment reversal gain and the operating cost in 2021 and 2020, respectively. Please refer to the description of Note 11.

(II) Prepayment for equipment

the Group's prepayments for equipment are the prepayments made for purchasing property, plant and equipment needed for production of the commodities or services to be supplied according to the purchase contracts.

(III) Guarantee deposits paid

The Group's guarantee deposits paid are mainly the Company's lease security money of NTD 128,400,000 under the Zhongli plant lease contract entered into by the Company and Delta Electronics Inc. in June 2019 and the guarantee deposit paid for the equipment construction bidding project, contract performance, and warranty service. Please refer to Note 40.

The contract performance deposit for inventory sale-leaseback loans of the deposits deductible from payments for purchased materials and non-returnable deposits paid according to the requirements of the material purchase contract signed between the Group's Tainergy and SunEdison Products Singapore Pte, Ltd. (originally named MEMC Singapore Pte, Ltd.) As of December 31, 2021 and 2020, the balance of the deposits deductible from payments for purchased materials was NTD 0. As of December 31, 2021 and 2020, an accumulated impairment loss of NTD 1,048,772,000 has been appropriated for its guarantee deposits paid. Please refer to the description of Note 41.

As of December 31, 2021, the balance of the deductible deposit was NTD 12,012,000 in accordance with the terms stipulated in the contract for procurement of materials entered into by the Group's Tainergy with other vendors in 2021.

(IV) Overdue receivables

The Group's overdue receivables are the receivables overdue more than 1 year, and 100% of the loss allowance with respect to such overdue receivables are recognized. Please refer to the description in Note 10.

(V) Other financial assets

The other financial assets of the Group were mainly the current deposits for application to the bank for issuance of acceptances and the current deposits and bank accounts pledged for acquisition of project tenders. Please refer to the description in Note 40.

XX. Loan

(I) Short-term loans

- (I) The Group's Tainergy will sell right-of-use assets and property, plant and equipment to Kunshan Changshunhong Energy Tech Co., Ltd. and received other receipts in advance of NTD 818,065,000. Please refer to Note 41.
- (II) Due to the requirements of the government's construction project, the Group's Kenmec Mecha-Tronics and Kenmec Technology (Suzhou) entered into a house demolition compensation agreement with the local government authority, and received demolition payments of RMB 37,000,000 and RMB 78,000,000, respectively, and paid demolition-related fees of RMB 11,022,000 and RMB 8,388,000, respectively.
- (III) For the deferred income generated from the government grants acquired by the Group, please refer to Note 32.
- (IV) The guarantee deposits received were mainly the performance bonds of the development project for the land in Kunshan, guarantee deposits received from the sale of properties and the relevant expenses collected/paid for others. Please refer to Note 41.

XXIII. Liability reserve

	December 31, 2021	December 31, 2020
Current Warranty (I)	\$ 10,945	\$ 17,627
Rework (II)	6,152	5,392
Onerous contract	3,320 \$ 20,417	7,660 \$ 30,679
Non-current Warranty (I)	<u>\$ 2,278</u>	<u>\$ 2,575</u>

- (I) The warranty liability reserve is the present value of the best estimate estimated for any future outflow of economic benefits due to warranty obligation by the Group's management according to the agreements in contracts for sale of commodities. The estimate is based on the Company's historical warranty experience and adjusted in consideration of new raw materials, procedural changes or other factors that influence the quality of the products.
- (II) The rework liability reserve is an estimated cost in case of rework for the goods that have been sold to the customer. It is stated as operating cost in the account. Since no significant effect is expected with the discount, the measured amount of the rework liability reserve is not discounted.

XXIV. Retirement benefit plan

(I) Defined contribution plan

The pension system applicable to the Company and the Group's Kentec and Tainergy according to the "Labor Pension Act" is the defined pension appropriation plan managed by the government. A pension equal to 6% of an employee's monthly wage shall be appropriated to the individual labor pension account at the Bureau of Labor Insurance.

(II) Defined benefit plan

The pension system applicable to the Group, Kentec and Tainergy of the Group according to the "Labor Standards Act" is the defined retirement benefit plan managed by the government. The years of service rendered and the average wage of six months prior to the approved retirement date shall be the reference for calculation of the pension to be paid to the employee. These companies appropriate 2% of the total wage of an employee as the labor pension fund every month and remit the amount to the labor pension reserve funds account at the Bank of Taiwan in the name of the Labor Pension Fund Supervisory Committee. Before the end of each year, if the assessed

balance in the account is inadequate to make a full payment of pensions to the employees who may meet the retirement conditions in the next year, we will make up the difference in one appropriation before the end of March the following year. The account is managed by the Bureau of Labor Funds, Ministry of Labor and the Group does not have the right to influence the investment management strategies.

The amounts of the defined benefit plan included in the consolidated balance sheet are listed as follows:

	December 31, 2021	December 31, 2020
Present value of defined benefit		
obligation	\$ 184,664	\$ 205,898
Fair value of plan assets	(106,944)	(<u>113,026</u>)

The amounts of the defined benefit plan recognized in profit or loss are summarized by function as follows:

	2021	2020
Operating costs	\$ 958	\$ 916
Marketing expense	283	362
Administrative expense	(1,015)	(604)
R&D expense	367	<u> 264</u>
	<u>\$ 593</u>	<u>\$ 938</u>

The Group is exposed to the following risks due to the pension system under the "Labor Standards Act":

- 1. Investment risk: The Bureau of Labor Funds, Ministry of Labor separately has invested the labor pension fund in domestic (foreign) equity and debt securities, and bank deposits. The investment is conducted at the discretion of the Bureau or under the mandated management. However, the profit generated from the Group's plan assets shall be calculated with an interest rate not below the interest rate for a 2-year time deposit with local banks.
- 2. Interest rate risk: A decrease in the interest rates of government bonds and corporate bonds leads to increase the present value of the defined benefit

- obligation, and the return on debt investment of the plan assets will be increased accordingly. The net defined benefit liabilities may be partially offset by both increases.
- 3. Salary risk: The present value of the defined benefit obligation is calculated with reference to the future salary of the plan participants. Therefore, the present value of the defined benefit obligation will be increased due to an increase in the plan participants' salary.

The Group's present value of the defined benefit obligation was calculated actuarially by a qualified actuary. The major assumptions on the date of measurement are as follows:

	December 31, 2021	December 31, 2020
Discount rate	0.625	0.5%
Anticipated salary increase rate	2.25% ~ 2.75%	2.25% ~ 3%

If there were any reasonably possible changes to the major actuarial assumptions separately, the resulting increase (decrease) in the present value of the defined benefit obligation in the situation where all the other assumptions remained the same is as follows:

	December 31, 2021	December 31, 2020
Discount rate Increase by 0.25% Decrease by 0.25%	$(\frac{\$ 4,219}{\$ 4,366})$	$(\frac{\$ 4,901}{\$ 5,081})$
Anticipated salary increase rate		
Increase by 0.25%	\$ 4,242	<u>\$ 4,887</u>
Decrease by 0.25%	$(\frac{\$ 4,122}{})$	$(\frac{\$}{4,741})$

Since the actuarial assumptions might be correlated to each other, and it was unlikely that the changes were only in a single assumption, the aforesaid sensitivity analysis might not reflect the actual changes in the present value of the defined benefit obligation.

	December 31, 2021	December 31, 2020
Expected contribution within 1		
year	<u>\$ 2,642</u>	<u>\$ 2,732</u>
Average maturity of defined		
benefit obligations	8.8-14.4 years	9.2-15.5 years

(III) Since B.V.I. – Kenmec International, Kenmec Technology, Kenmec Fuqing, Kenmec Mecha-Tronics, Kenmec Property Development, Fraternity Kunshan, B.V.I. – Kenmec Communication, Kenmec Vietnam, Ample, SAMOA – Tainergy Tech., Tainergy Kunshan, Kunshan SENSIC Electronic Materials Co., Ltd., Kunshan Jichang Energy Technology Co., Ltd., and Vietnergy Company Limited of the Group have not established employee retirement regulations and the local government does not formulate mandatory employee retirement regulations, the aforesaid information does not apply.

XXV. Maturity analysis on asset liabilities

The assets and liabilities of the Group with respect to the construction business are classified as current or non-current with the operating cycle as the standard. The related amount recognized based on the amount anticipated to be recovered or reimbursed within a year and more than a year after the balance sheet date is as follows:

December 31, 2021 Assets Contract assets S 22,299 S 422,698 S 444,997		a year and more than a year after t	iic o	alance sin	More than 1	3.

- 1. These capital reserves may be used to make up losses or to distribute cash dividends or be transferred into the capital if the Company does not incur a loss. However, the amount of the transfer into the capital shall be limited to a certain percentage of the paid-in capital in every year.
- 2. These capital reserves are the equity transaction effects recognized by the Company as a result of the changes of the equity in subsidiaries when the Company does not actually acquire or dispose the equity of the subsidiaries, or the adjustments for the Company to recognize subsidiaries' capital reserves under the equity method.

(III) Retained earnings and dividend policy

The Company approved the Articles of Incorporation through the resolution made at the shareholders' meeting on June 23, 2020. They expressly specify that the Company authorizes the Board of Directors to distribute the distributable dividends and bonuses in the form of cash and report at the shareholders' meeting.

According to the Company's earnings distribution policy specified in the amendments of the Articles of Incorporation, if the Company has a profit at the year's final accounting, it shall first pay the income tax and make up any cumulative losses in accordance with laws, and then make a 10% contribution of the balance to the legal reserve, and also make provision/reversal of special reserves pursuant to the laws. Any balance thereof shall, together with the accumulated undistributed earnings and the "adjusted amount of the annual undistributed profits," be submitted by the Board of Directors in the form of an earnings distribution proposal to the shareholders' meeting for ratification. For the distribution policy of employee and director/supervisor remuneration stipulated in the Company's Articles of Incorporation, please refer to in Note 28 (VII) Remuneration to employees, directors, and supervisors.

The Company's business is currently in the stage of operational growth, requiring profits to be retained as funding necessary for operational growth and investments. Therefore, the Company currently adopts a "balance as dividend" policy, giving consideration to the distribution of a balanced dividend equaling at least 50% of the annual net profits after tax. The Board of Directors may, however, submit a proposal for distribution to the shareholders' meeting for decision after taking into account the actual funding situation of the Company.

Profits may be distributed in the form of a combination of cash and stock dividends, provided that cash dividend is at least 20% of the total dividend. The shareholders' meeting may, however, make adjustment thereto based on future funding plans.

Legal reserves shall be prepared to the amount at which the balance of the legal reserves reaches to the total paid-in capital. Legal reserves may be used to make up loss. Where the Company does not sustain loss, the part of the legal reserves that exceeds the total paid-in capital by 25% may be appropriated as capital or distributed by cash.

The Company held annual general meetings on August 27, 2021, and June 23, 2020. Earnings distribution and loss make-up proposals in 2020 and 2019 approved at the said meetings are as follows:

	2()20	 20)19
Legal reserves	\$		\$ 13	4,786
Special reserves	\$	<u> </u>	\$ 20	<u>9,226</u>
Cash dividend	\$	<u>-</u>	<u>\$ 49</u>	2,022
Cash dividends from capital				
reserves	\$ 37	0,517	\$	<u>=</u>
Cash dividend per share (NTD)	\$	-	\$	2.0
Cash dividends from capital				
reserves per share				
(NTD)	\$	1.5	\$	-

The proposal for distribution of earnings in 2021 resolved by the Board of Directors on March 18, 2022 is as follows:

	2021
Special reserves	(\$ 9,455)
Cash dividends from capital	<u>\$ 395,218</u>
reserves	
Cash dividends from capital	\$ 1.6
reserves per share (NTD)	

The proposal for distribution of earnings in 2021 is to be resolved at the annual shareholders' meeting to be held on June 24, 2022.

(IV) Special reserves

	2021	2020
Balance – beginning of the year	\$ 328,572	\$ 119,346
Earnings set aside as special	_	209,226
reserve		
Balance – ending of the year	\$ 328,572	\$ 328,572

The special reserve set aside for the land when IFRSs are applied for the first time may be reversed at the time of disposal or reclassification. The special reserve set aside for the exchange differences from the translation of foreign operations' financial statements (including subsidiaries) is reserved according to the percentage of disposal. It will be completely reversed when the Group loses the significant influence. When earnings are distributed, a special reserve shall be set aside for the difference between the net deduction of other shareholder's equities stated on the end date of the reporting period and the special reserve set aside when IFRSs are applied for the first time. If there is any reversal of the decrease in shareholders' equity, the earnings may be distributed based on the reversal proportion.

(VII)	Treasury stocks		Transfer of shares
	Cause of repurchase Number of shares on January 1, 2020		to employees (thousand shares) 2,000
	Increase in the year Decrease in the Year Number of shares on December 31, 2020		1,000 (<u>3,000</u>)
	Number of shares on January 1,		
	2021 Increase in the year Number of shares on December		2,000
	31, 2021		<u>2,000</u>

According to the Securities and Exchange Act, the number of shares repurchased may not exceed ten percent of the Company's total number of issued shares; the total amount of the repurchased shares may not exceed the amount of retained earnings plus premium on capital stock and realized capital reserve. The shares repurchased by the

Company as mentioned above shall be transferred within 3 years of the repurchase date. Otherwise, the shares shall be deemed as not issued by the Company, and amendment registration shall be processed.

On August 17, 2020, the Group transferred 2,000,000 treasury shares and 1,000,000 common stocks to the employees at a price of NTD 15.56 and NTD 14.77 per share, respectively. the Group recognized NTD 16,510,000 in compensation cost on the grant date. The total transfer price was NTD 45,890,000. The difference of NTD 16,382,000 after deduction of the treasury stock trading cost of NTD 137,000 and the treasury stock buyback cost of NTD 45,881,000 was credited under Group's capital reserve – treasury stock trading NTD 16,294,000 and non-controlling equity increase NTD 88,000. The record date was August 17, 2020.

The Black-Scholes valuation model was used for the employee stock options granted by the Group in August 2020. The inputs used in the valuation model are as follows:

	August 2020
Price on grant date	NTD 20.8
Exercise price	NTD 15.56/14.77
Anticipated volatility	39.17
Lifetime	0.068 years
Expected dividend rate	-
Risk-free interest rate	0.1165

The anticipated volatility is based on the historical stock price volatility over the past year. It is acquired by calculating the daily natural log return during the sample period based on the daily adjusted stock price and multiplying the daily return standard deviation by the radical 243.

According to the Securities and Exchange Act, the treasury stock held by the Group may not be pledged and entitled to any dividends and voting rights.

XXVII. Revenue

	2021	2020
Revenue from contracts with		
customers		
Revenue from sale of		
products	\$ 2,474,401	\$ 3,089,459
Project income	1,507,230	1,121,514
Service income	<u>57,274</u>	87,317
	<u>\$4,038,905</u>	<u>\$4,298,290</u>

(I) Description of contracts with customers

1. Revenue from sale of commodities

Revenue from sale of commodities is generated from the sales of products. Once the products are delivered to the customer-designated location and accepted by the customer, the customer is entitled to the products' price determination and right of use, has the main responsibility to resell the products, and takes the risk that the products might become outdated. Therefore, the revenue and accounts receivable are recognized at that point of time.

Solar cells and modules were sold to downstream manufacturers in the solar energy sector. the Group sold the products at the price agreed in the contract, quotation or order.

2. Project income

Since the cost of construction is directly related to the percentage of fulfillment of the contractual obligation, the Group measures the progress based on the percentage of the actually invested cost in the estimated total cost. the Group progressively recognizes contract assets during the construction and transfer them to accounts receivable when issuance of bills. If the construction project proceeds received exceed the revenue recognized, the difference is recognized as contract liabilities. Construction retainage retained by customers according to contractual terms and conditions is to ensure that the Group fulfills all the contractual obligation thereof and is recognized as contract assets before the fulfillment of the contract.

If the result of the fulfillment cannot be measured reliably, the contract income is recognized only within the scope of the actually incurred contract fulfillment cost expected to be recovered.

3. Service income

Service income derives from repair of equipment.

With provision of the equipment repair service from the Group, the customer acquires and consumes the benefit from performance of the contract. Related income is recognized when services are completely provided. Since payment is made after completion of the repair as agreed in the contract, the Group recognizes the service income as contract assets when the service is provided and transfer it to account receivable when the repair is completed.

(VII) Remuneration to employees, directors and supervisors

After deducting the profit before tax of the current year prior to distribution of the remuneration to employees, directors and supervisors, the amount to the percentage of 5%–15% was distributed as remuneration to employees and 1%–3% was distributed as the remuneration to directors and supervisors.

Since there are losses before tax in 2021 and 2020, no estimates were made for the remuneration to employees and directors/supervisors.

There was no discrepancy between the actual distribution of the remuneration to employees and directors/supervisors in 2020 and 2019 and the amount recognized in the separate financial reports in 2020 and 2019.

If there were any changes in the amount after the approval and release date of annual separate financial reports, the change was treated as a change in accounting estimates and accounted for in the following year.

The information about the remuneration to employees and directors/supervisors in 2021 and 2020 resolved by the Board of Directors may be viewed on the Market Observation Post System of the TWSE.

(VI) Information on unused investment tax credits, loss carryforwards and tax exemption

The 2014 investment plan of Tainergy of the Group for expanding the production scale of solar cells and their modules by increase of capital was approved by the Industrial Development Bureau, Ministry of Economic Affairs, by Letter Gong-Zhong-Zi No. 10305100630 on December 25, 2014, and the profit-seeking business income tax was exempted for 5 consecutive years from January 1, 2018.

As of December 31, 2021, the following income from the expansion of the production scale by increase of capital is tax-free for five years:

Expansion by Increase of Capital	Tax Exemption Period
Production of solar cells and their modules	2018 to 2022

(VII) Authorization of income tax

The Group's profit-seeking business income tax filings up until 2019 have been approved by the tax authority.

Weighted average number of		

247,226

247,226

Unit: NTD per share

247,218

247,218

When the Group can select stocks or cash as the remuneration to employees, it is assumed that the employee's remuneration is paid with stocks when the diluted EPS is calculated. The weighted average outstanding common stocks are added when the potential common stocks have diluting capability to calculate the diluted EPS. The diluting capability of the potential common stocks is referenced in the next year when the Board of Directors resolved to calculate the diluted EPS prior to payment of the employee's remuneration with stocks.

XXXI. Share-based payment arrangement

(I) On May 21, 2021, the Group's Taisic Materials retained employee stock options due to a cash capital increase. Information on employee stock options already issued is as follows:

	2021			
	Weighte			
		average		
	Unit	exercise

In 2021, the Group recognized remuneration costs of NTD 3,780,000 for the share-based payment agreement.

(II) 2021 capital increase by cash retained for employee stock options

The Board meeting of the Group's Tainergy held on September 3, 2021, resolved to issue 25,000,000 shares of common stock at NTD 10 per share for a total of NTD 250,000,000 for capital increase by cash. The date of employee stock options granted for capital increase by cash was September 7, 2021. As required by Article 267 of the Company Act, 10% was retained for employees to subscribe, totaling 2,500,000 shares, with NTD 8,500,000 recognized as remuneration costs.

XXXII. Government grants

- Tainergy Technology (Kunshan) Co., Ltd. of the Group established factories in Kunshan Economic and Technological Development Zone (KETD) for production of solar cells in 2008. To provide preferential investment conditions, the KETD Administration Committee agreed on a one-off subsidy of NTD 155,756,000 for construction of infrastructure in consideration of the investment of the Tainergy Technology (Kunshan) Co., Ltd. and the geology of the land for which the right-of-use had been acquired. The subsidy was subject to amortization in 50 years based on the effective period of the right-of-use of the land. The Board meeting held on October 22, 2021, approved to dispose of part of the land use rights; therefore, NTD 43,176,000 was reclassified to liabilities directly related to non-current assets held for sale. As of December 31, 2021 and 2020, the balance of the amortization was NTD 61,914,000 (RMB 14,253,000) and NTD 108,725,000 (RMB 24,840,000), respectively, and stated as long-term deferred income. NTD 2,812,000 and NTD 2,774,000 were recognized in profit in 2021 and 2020, respectively.
- (II) Tainergy Technology (Kunshan) Co., Ltd. of the Group acquired a one-off equipment subsidy of NTD 3,889,000 (RMB 859,000) from the government in 2015, 2016 and 2017, respectively. The respective subsidy was subject to amortization in 5 to 10 years

- based on the useful life of the equipment. As of December 31, 2021 and 2020, the balance of the amortization was NTD 1,083,000 (RMB 249,000) and NTD 1,668,000 (RMB 381,000), respectively, and stated as long-term deferred income. NTD 574,000 and NTD 847,000 were recognized in profit in 2021 and 2020, respectively.
- (III) The Group applied for subsidies of wage and working capital for the struggling companies in the manufacture and technical service industries affected by severe pneumonia with novel pathogens, and, as of December 31, 2021 and 2020, received grants amounting to NTD 18,567,000 and NTD 53,447,000, respectively, from the Ministry of Economic Affairs.
- (IV) The Group's Kentec applied for the "Cloud Server Human-Machine Collaboration Production Optimization Project" from the Taiwan Industry Innovation Platform Program, Ministry of Economic Affairs. Subsidies recognized for the project in 2021 totaled NTD 6,327,000.
- (V) The acceptance inspection of the solar power system construction project that the Group's Tainergy implemented in Zhongli plant, Taoyuan City, was completed in October 2011, and a subsidy of NTD 76,616,000 was acquired from the Bureau of Energy, Ministry of Economic Affairs. This amount was stated as deferred income and subject to amortization in 16 years based on the economic benefit period of the project. Due to changes to the lease period of the premises where the solar power system was constructed, the relevant useful life was adjusted and the Group's Tainergy amortized the transferred profit/loss in the remaining lease period of 18 months from the date on which the contract was revised. As of December 31, 2020, NTD 24,705,000 was recorded as long-term deferred income, and NTD 24,705,000 was recognized in profit in 2020.
- (VI) Cheng Yang Energy Co., Ltd. of the Group acquired a subsidy of NTD 1,000,000 from the government in July 2019 for construction of the PV generation system. This amount was stated as deferred income and transferred in profit/loss within the useful life of the assets. It was then disposed and transferred by Cheng Yang Energy in April 2020. A gain of NTD 66,000 was recognized in 2020.

XXXV. Equity transaction with respect to non-controlling equity

In January 2021, the Group did not increase the capital of Tainergy Tech. according to its shareholding ratio, resulting in a decrease in shareholding ratio from 28.83% to 10.30%.

In May 2021, the Group did not increase the capital of Taisic Materials according to its shareholding ratio, resulting in a decrease in shareholding ratio from 28.57% to 24.30%.

In September 2021, the Group did not increase the capital of Tainergy according to its shareholding ratio, resulting in a decrease in shareholding ratio from 28.83% to 27.20%.

In December 2021, the Group disposed of shares of Tainergy Tech., resulting in a decrease in shareholding ratio from 27.20% to 27.19%.

The Group acquired more equities in Tainergy Tech. Co., Ltd. in 2020 and the shareholding rose from 28.77% to 28.83%.

In January 2020, the Group did not increase the capital of Kenmec Property Development according to its shareholding ratio, resulting in an increase in shareholding ratio from 77.38% to 78.63%.

In March 2020, the Group did not increase the capital of Kenmec Property Development according to its shareholding ratio, resulting in a decrease in shareholding ratio from 78.65% to 77.40%.

Since these trades do not change the control of the Group over the aforementioned subsidiaries, the Group deals with them as transaction of equity.

XXXVI. Information on cash flow

(I) Non-cash transactions

In addition to those disclosed in other notes, the Group was engaged in the following non-cash investment and financing activities in 2021 and 2020:

- 1. The Group reclassified NTD 3,081,000 and NTD 3,811,000 of contract assets into property, plant and equipment in 2021 and 2020, respectively.
- 2. The Group reclassified NTD 14,725,000 and NTD 204,470,000 of prepayment for equipment into property, plant and equipment in 2021 and 2020, respectively.
- 3. The Group reclassified NTD 15,000,000 prepaid investments to financial assets at fair value through profit or loss noncurrent in 2021.
- 4. The Group disposed of NTD 792,000 of investment receivables through financial instruments measured at fair value through profit or loss in 2021.
- 5. The Group reclassified NTD 76,175,000 of right-of-use assets into non-current assets held for sale in 2021.
- 6. The Group reclassified NTD 810,137,000 of property, plant and equipment into non-current assets held for sale and NTD 40,419,000 into investment property in 2021.
- 7. The Group reclassified NTD 672,285,000 of inventories into investment property in 2021.
- 8. The Group's equipment payable from purchase of property, plant and equipment decreased NTD 304,491,000 in 2021.
- 9. The Group's equipment payable from purchase of property, plant and equipment increased NTD 271,725,000 in 2021.

XXXVII. Capital risk management

The Group conducts capital management to ensure the companies of the Group can keep operating while maximizing shareholders' return by optimizing the liability and equity balances. The overall strategy of the Group is currently not changed.

The capital structure of the Group is comprised of their net liabilities (i.e. loans minus cash and cash equivalents) and shareholders' equity (i.e. capital stock, capital reserves, retained earnings, other equities, and non-controlling equity).

The Group did not need to adhere to external capital requirements.

The key management of the Group conducts monthly review of the Group's capital structure, including the cost of capital and relevant risks. Observing the suggestions of the key management, the consolidate companies balance the overall capital structure by paying dividends, issuing new stocks, repurchasing stocks, and issuing new corporate bonds, or repaying existing liabilities.

XXXVIII. <u>Financial instruments</u>

- (I) Fair value information financial instruments not measured at fair value
 As of December 31, 2021 and 2020, the Group did not have any financial assets and liabilities having major differences between book and fair values.
- (II) Fair value information financial instruments measured at fair value on a repetitive basis
 - 1. Fair value hierarchy December 31, 2021

December 31, 2021				
	Level 1	Level 2	Level 3	Total

3. Evaluation technology and inputs of Level 2 fair value measurement
Class of financial instruments Evaluation technology and inputs

Derivative instruments – forward foreign exchange contract

Structured deposit mandatorily measured at fair value through profit or loss Cash flow discounting method: With this method, the cash flow in the future is estimated based on the observable forward exchange rate at the end of the period and the exchange rate specified in the contract, and the discount is determined with reference to the discount rate reflecting the credit risk of the counterparty.

As for the fair value, the discount rate curve inferred from the open market quote is used as the parameter for calculation of the cash flow discount value in the future, and this value is used as the basis for the estimation.

- 4. Evaluation technology and inputs measured at Level 3 fair value
 - (1) Derivatives The fair value of the exchange rate option is estimated using the Option pricing model for convertible bond valuation. The significant unobservable input used is the exchange rate volatility. The fair value of the derivatives becomes higher when the exchange rate volatility increases.
 - (2) The fair value of non-listed (non-OTC) equity instruments is estimated based on the analysis of the financial status and operating outcome of the investee, the latest transaction price, the quotation of the same equity instruments on active markets, the quotation of similar instruments on active markets, comparable company valuation multiples, and other assumptions that cannot be supported by the observable market price or interest rate. The significant unobservable inputs are as follows. The fair value of the investment increases when the long-term revenue growth rate and pre-tax operating margin increase.

- Note 1: The balance includes financial assets measured at amortized cost such as cash and cash equivalents, investment in liability instruments, notes and accounts receivable, other receivables, guarantee deposits paid and other financial assets. This balance includes the balance of assets transferred to the disposal group held for sale.
- Note 2: The balance includes financial liabilities measured at amortized cost such as short-term loans, notes and accounts payable, other payables, long-term liabilities mature within one year, guarantee deposits received, long-term loans, and other financial liabilities. This balance includes the balance of liabilities transferred to the disposal group held for sale.
- (IV) Financial risk management purpose and policy

The Group's main financial instruments include investments in equity and liability instruments, accounts receivable, accounts payable, borrowings, and lease liabilities. The Group's financial management department is responsible for provision of services for business units, planning and coordination of investments in domestic and international financial markets, analysis of internal risk exposure based on the risk level and scope, and reporting, supervision, and management of the financial risks related to the Group's operations. The said risks include the market risk (such as exchange rate risk, interest rate risk and other price risks), credit risk and liquidity risk.

The Group uses derivative financial instruments to avoid risk exposure and mitigate the impact of such risks. Derivative financial instruments are subject to the policies adopted at the meeting of the Board of Directors of the Group. These policies include the exchange rate risk, interest rate risk, credit risk, use of derivative and non-derivative financial instruments, and the written current funds investment principle. Internal reviewers review the compliance of the policies and the exposure limits on an ongoing basis. The Group does not conduct transactions of financial instruments (including derivative financial instruments) for speculation purposes.

The finance management department reports to the Risk Management Committee of the Group every quarter. The Committee is an independent organization dedicated to monitoring risks and implementing policies to mitigate risk exposure.

1. Market risk

The major financial risks that the operating activities imposed on the Group are exchange rate fluctuation risk (see (1) below), interest rate fluctuation risk (see (2) below), and other price risks (see (3) below). The Group is engaged in various derivative financial instruments to manage the imposed foreign exchange rate and interest rate risk, including:

- A. Forward exchange contracts or exchange rate options for avoidance of the exchange rate risk due to difference of currencies in collection, payment, and purchase of (raw) materials;
- B. Maintenance of an adequate portfolio of fixed and variable interest rates to mitigate the fluctuation risk of cash flow and fair value.

The Group does not change the risk exposure on the financial instrument market or the methods for management and measurement of such exposure.

(1) Exchange rate risk

The Group is engaged in sales and purchases transactions in foreign currency. These transactions expose the Group to the exchange rate fluctuation risk. About 58% of the sales amount of the Group is not valuated with the functional currency of the Group's individual entities engaging in the transactions. About 72% of the cost amount is not valuated with the functional currency of the Group's individual entities engaging in the transactions. The Group uses forward foreign exchange contracts or exchange rate options to manage the exchange rate risk within the policies.

Refer to Note 43 for the book value of the monetary assets and liabilities of the Group valued with non-functional currencies on the balance sheet date (including the monetary items valued with non-functional currencies and written off on the consolidated financial statements) and the book value of the derivative instruments exposed to exchange rate risk.

Sensitivity analysis

The Group is affected primarily by the fluctuation in the exchange rate of USD and RMB.

The sensitivity analysis of the Group in the exchange rate of NTD (functional currency) to any related foreign currencies increasing or decreasing by 3% is described in the following table. This 3% is the sensitivity ratio used by the Group when reporting the exchange rate risk to the key management. It also indicates the assessment of management on the reasonable potential fluctuation of the exchange rate. The sensitivity analysis only included the outstanding foreign currency items. The translation thereof at the end of the year is adjusted by an increase or decrease of 3% in the exchange rate. The sensitivity analysis includes the loans that are not valued with the functional currency of the creditor or borrower. The positive number in the following table means the reduced amount of the post-tax net loss or equity when NTD depreciates by 3% against related currency; when NTD appreciates by 3% against related currency, the effect on the post-tax net profit/loss or equity is represented with a negative number of the same amount.

	Effect of USD			Effect of RMB				
	2021		2020		2021		2020	
Profit or loss	\$	568 (i)	\$	2,985 (i)	\$	9,640 (i)	\$	16,590 (i)

(i) The profit or loss was mainly generated from the Group's accounts receivable, accounts payable and loan valued in USD and RMB which were outstanding on the balance sheet date and were not hedged against the cash-flow risk.

The sensitivity of the Group to the USD exchange rate decreased this year due to an increase in the accounts payable in USD; the sensitivity to the RMB exchange rate decreased due to a decrease in accounts receivable in RMB. Management found that the sensitivity analysis could not represent the inherent risk of exchange rate, as the foreign currency risk

exposure on the balance sheet date could not reflect the exposure in the year.

(2) Interest rate risk

The interest rate risk exposure occurred as the Group's entities borrowed funds at the floating rates at the same time. The Group maintains an adequate portfolio of fixed interest rate to manage the interest rate risk. The Group assesses hedging activities on a regular basis to keep consistent in their opinions on interest rate and their given risk preference to ensure adoption of most cost-efficient hedging strategies.

The book value of the financial assets and liabilities of the Group exposed to the interest rate risk on the balance sheet date are as follows:

_	December 31, 2021	December 31, 2020
With fair value interest		
rate risk		
Financial assets	\$ 353,809	\$ 593,586
Financial		
liabilities	351,874	110,881
With cash flow interest		
rate risk		
Financial assets	1,641,571	1,634,489
Financial		
liabilities	1,474,536	1,970,381

The Group is exposed to cash flow interest rate risk due to holding bank loans at variable interest rate. This conforms to the policy of the Group to reduce the interest rate fair value risk by maintaining the loans at floating interest rate. The cash flow interest rate risk of the Group is primarily due to the fluctuated benchmark interest rate of the loans valued in NTD.

Sensitivity analysis

The following sensitivity analysis is based on the interest rate risk exposure of the derivative instruments and non-derivative instruments on the balance sheet date. As for the liabilities at floating interest rate, the analysis is made with the assumption that the outstanding liability amount on the balance sheet date is completely in circulation during the reporting period. The variable interest rate used by the Group when reporting the interest rate to the key management is the interest rate plus or minus 1%. It also indicates the assessment of management on the reasonable potential fluctuation of the interest rate.

If the interest rate increased/decreased by 1%, with all other variables held constant, the net loss after tax of the Group in 2021 and 2020 increased/decreased by NTD 1,336,000 and decreased/increased by NTD 2,687,000, respectively, primarily due to the exposure of the Group's loans at variable rate to interest rate risk.

(3) Other price risks

The Group sustains exposure to equity securities price risk due to investment in publicly offered equity securities and beneficiary certificates. The Group's management manages risk by holding different risk investment portfolios. The Group designates responsible teams to monitor

the price risk and assess when the hedging position shall be increased for the risk.

Sensitivity analysis

The following sensitivity analysis is based on the equity price risk exposure on the balance sheet date.

If the equity price increased/decreased by 3%, the profit or loss after tax in 2021 and 2020 increased/decreased by NTD 3,155,000 and NTD 1,623,000, respectively, due to increases/decreases of the fair value of the financial assets measured at fair value through profit or loss. Other comprehensive income after tax in 2021 and 2020 increased/decreased by NTD 1,074,000 and NTD 844,000, respectively, due to changes in the fair value of the financial assets measured at fair value through other comprehensive income.

The sensitivity of the Group to the price risk increased in the current period due to an increase in the investment in equity securities.

2. Credit risk

The credit risk refers to the risk in the financial loss of the Group due to the counterparty delays in the fulfillment of the contractual obligations. Up to the balance sheet date, the Group's potential highest credit risk exposure due to failure of the counterparty to fulfill its obligations and the financial loss brought about by the financial guarantee that the Group provided was mainly derived from the book value of the financial assets recognized in the consolidated balance sheet.

According to the policy, the Group only trades with the counterparties that are rated equivalent to the investment level or higher in brand awareness. Full guarantees are required if necessary to reduce the risk of financial losses due to default. In addition, the Group rates customers with reference to open financial information as well as mutual trading records. The Group monitors the credit risk exposure and the credit rating of the counterparties on an ongoing basis. The account of the customers is checked before the shipment to make sure there is no overdue payment and how the collection status is in the recent period, and the internal personnel of the Group supervises the release in order to minimize the potential credit risk. In addition, the Group reviews the recoverable amount of accounts receivable separately on the balance sheet date to make sure that the appropriate impairment loss of the accounts receivable that cannot be recovered is recognized. As such, management of the Group finds that the credit risk of the Group is reduced significantly.

Receivables are to be collected from many customers. They belong to different industries and are located in different geographic areas. The Group continuously assesses the financial status of the customers from which receivables shall be recovered.

3. Liquidity risk

The Group manages and maintains sufficient cash and cash equivalents to support the Group's business operation and reduce the effect of the fluctuating cash flow. Management of the Group monitors the use of financing facility and ensures compliance with the terms of the loan contract.

For the Group, bank loans are one of the important sources of liquidity. For the financing facility that the Group has not used, refer to relevant descriptions in (3) below.

(1) Liquidity and interest rate risks of non-derivative financial liabilities

The remaining contractual maturity analysis of the non-derivative financial liabilities is compiled based on the earliest repayment date required to the Group and the non-discounted cash flow of the financial liabilities (including the principal and estimated interest). Hence, the bank loan which the Group may be requested to repay immediately is listed in the earliest period on the table without consideration of the possibility of the bank to exercise this right immediately; the maturity analysis of other non-derivative financial liabilities is compiled based on the agreed repayment date.

For the cash flow of the interest paid at floating rate, the non-discounted interest amount is derived from the yield curve on the balance sheet date.

XLI. Significant contingent liability and unrecognized contractual commitment

In addition to those described in other notes, the Group's significant commitments and contingencies on the balance sheet date are as follows:

- (I) Significant commitments
 - 1. The amount under the letters of guarantee that the Group authorized banks to issue for performance of construction contracts or warranty of works and the balance of the unused letters of credit are as follows:

	December 31, 2021	December 31, 2020
Issuance of letters of		
<u>guarantee</u>		
NTD	\$ 890,270	\$ 829,305
USD	7,038	9,397
Unused opened letter of		
credit		-00
JPY	-	28,268

2. The total price of the contract entered into by Tainergy of the Group for completion and purchase of unfinished construction and equipment and the amount unpaid are as follows:

	December 31, 2021	December 31, 2020
Purchase of unfinished		
construction and		
equipment		
Total contract price	\$ 88,830	\$ 284,346
Amount paid	$(\underline{40,415})$	$(\underline{155,766})$
Amount unpaid	<u>\$ 48,415</u>	<u>\$ 128,580</u>

3. As of December 31, 2021 and 2020, the amount of the guarantee notes issued by the Group's Tainergy for loans was NTD 300,000,000 and NTD 510,000,000, respectively. As for the amount of the endorsement/guarantee provided for loans, please refer to Table 2 in Note 40.

(II) Contingency

1. Material purchase agreement between Tainergy of the Group and SunEdison Products Singapore Pte, Ltd. (the former MEMC Singapore Pte, Ltd.; hereinafter referred to as SunEdison)

Material purchase agreement

Tainergy of the Group entered into a material purchase agreement with SunEdision on July 9, 2008. According to the agreement, the Group should purchase solar wafers no less than USD 3.4 billion from SunEdison from September 1, 2008 to August 31, 2018, and should provide a performance bond amount to about USD 10,500,000 to 66,500,000 (about NTD 299,040,000 to 1,893,920,000) every year during the period of the agreement.

Due to the fluctuation of the solar cell material, Tainergy of the Group did not purchase to the minimum quantity as agreed. A supplementary agreement was entered into with SunEdision on March 29, 2013 in which a common consensus was reached and the parties agreed to maintain their collaboration relation. According to the supplementary agreement, a compensation for failure to purchase to the minimum quantity was deducted from the performance bond that Tainergy of the Group had paid. For this, the Group recognized a loss on guarantee deposits paid amounting to NTD 760,763,000 in 2012 and set aside the unamortized balance of non-returnable deposits paid to the amount of UTD 59,551,000 as impairment loss under the title of other non-current liabilities – others. The total amount was consequently NTD 820,314,000.

SunEdison's application for reorganization

SunEdision announced its application for reorganization procedures on April 21, 2016 (American time). The Group discussed with the counsels and comprehensively assessed the possibility of recovery based on SunEdison's debt restructuring plan and creditor meeting notice of June 2017. After deduction of an advance sales receipts of NTD 1,063,000 (net) from related other receivables of NTD 20,854,000 and guarantee deposits paid amounting to NTD 288,009,000, an impairment loss of NTD 307,800,000 was set aside in Q2 of 2017. In 2021, relevant other accounts receivable of NTD 6,835,000 were recorded under impairment loss.

As of December 31, 2021 and 2020, the balance of the guarantee deposits paid to the Group's Tainergy was recorded as NTD 0.

2. The silicon wafer purchase agreement between Tainergy of the Group and Sino-American Silicon Products Inc. (hereinafter referred to as Sino-American Silicon) Commitment to material purchase agreement

Tainergy of the Group entered into a material purchase agreement with Sino-American Silicon in September 2007. The parties agreed on an annual purchase of solar wafers to the quantity, at the price, and amounting to no less than USD 44,388,000 and EUR 85,518,000 as specified in the agreement from January 1, 2008 to December 31, 2010 and from January 1, 2009 to December 31, 2019, respectively. The prepayments were not returnable and the supplier guaranteed to supply the material to the agreed quantity. Tainergy of the Group prepaid for purchase of the material by installments to the amount of EUR 7,470,000 during the period specified in the agreement.

Renewal of the agreement

Tainergy of the Group and Sino-American Silicon agreed to perform the agreement continuously in accordance with the terms and conditions specified therein up to December 31, 2020 (included) If the fulfillment of the agreement is difficult to the parties due to changes of the market supply and demand, the parties agreed to discuss the performance of the agreement. Currently, the parties are willing to continue the fulfillment of the agreement.

As of December 31, 2021 and 2020, the Group's Tainergy made an assessment and found that the cost for fulfillment of the agreement would be higher than the anticipated economic benefit from the agreement, and thus set aside an accumulated loss of NTD 166,969,000 and NTD 180,257,000, respectively. As of December 31, 2021 and 2020, the balance of the prepayments that the Group's Tainergy has made and against which goods were not delivered yet was both recognized to the amount of NTD 0.

3. Tainergy Technology (Kunshan) Co., Ltd., a subsidiary of the Group, entered into an agreement with a local assets management company for construction of a new factory building based on the right-of-use of the land that the Group had in Mainland China. the Group did not have to pay any money or fee to the assets management company for the construction project. After the construction of the factory building was completed, the Group agreed to establish a new subsidiary with cash and the fixed price of the surface building. The asset management company originally planned to purchase all the shares of the new subsidiary after it acquired the real estate ownership certificate. However, due to a change in the transaction mode resolved by the Board of Directors on October 22, 2021, the Company directly disposed of the land use right and the ground building. The transaction counterparty was the newly established subsidiary of the asset management company. The transaction price was the same as the original agreement.

The Group's accounts related to this transaction are as follows:

The Group was selling the real estate and land to Kunshan Changshunhong Energy Tech Co., Ltd. As land transfer settlement was too long, the Group will submit arbitration-related documents within the deadline to facilitate the completion of the transfer settlement to ensure the legal rights and interests of the transaction. On January 25, 2022, the Group participated in the arbitration meeting and delivered a defense brief to the Suzhou Arbitration Commission. Due to COVID-19, a hearing was yet to be held as of March 30, 2022.

4. In March 2022, Mr. Chun-Ming Chen filed a lawsuit against the Company at the Civil Court of Shilin District Court, Keelung, claiming that the Company should repay a sum of RMB 15,000,000. A hearing was yet to be held as of March 30, 2022. The Company claimed that it did not borrow funds from Chun-Ming Chen. After evaluation, the lawsuit should not have a material impact on the Company's financial and business affairs. Additionally, based on the letter replied by a professional law firm, it is difficult to support the idea that the Company has borrowed funds from Mr. Chen based on the evidence provided by him.

XLII. Significant subsequent events: None

XLIII. <u>Information on foreign currency assets and liabilities with significant effect</u>

The following information is summarized and stated based on the foreign currencies other than the functional currency of the Group's individual entities. The disclosed exchange rate represents the exchange rate of such foreign currency to the functional currency. Information on foreign currency assets and liabilities with significant effect is as follows:

December 31, 2021

The profit and loss from translation of foreign currency (including realized and unrealized) in 2021 and 2020 was NTD 6,989,000 and NTD 7,927,000, respectively. However, it is not feasible to disclose the exchange loss and gain of each significant foreign currency because of the numerous functional currencies used by each entity of the Group and in foreign currency transactions.

XLIV. Disclosures of notes

- (I) Major transaction matters:
 - 1. Loans to others. (Table 1)
 - 2. Endorsements/Guarantees for Others (Table 2)
 - 3. Securities ending (excluding the equity in invested subsidiaries, associates and joint ventures). (Table 3)
 - 4. Aggregate purchases or sales of the same securities reaching NTD 300 million or more than 20% of the paid-in capital. (Table 4)
 - 5. Acquisition of real estate reaching NTD 300 million or more than 20% of the paid-in capital. (None)
 - 6. Disposal of property reaching NTD 300 million or more than 20% of the paid-in capital. (None)
 - 7. Purchases or sales of goods from and to related parties reaching NTD 100 million or more than 20% of the paid-in capital. (Table 5)

- 8. Accounts receivable from related parties reaching NTD 100 million or more than 20% of the paid-in capital. (Table 6)
- 9. Trading in derivative instruments. (Note 7 and 38)
- 10. Others: The business relationship and important transactions between the parent company and its subsidiaries, and between subsidiaries. (Table 7)
- (II) Information about investees. (Table 8)
- (III) Information on investments in Mainland China:
 - 1. Information about investees in Mainland China, such as the name, main business operations, paid-in capital, method of investment, inward and outward remittance of funds, shareholding ratio, investment profit/loss, investment book value at the end of the period, profit or loss received from investments, and limit on the amount of investment in Mainland China. (Table 9)
 - 2. Any of the following significant transactions with investees in Mainland China, either directly or indirectly through a third area, and their prices, payment conditions, and unrealized profit/loss: (Table 10)
 - (1) The amount and percentage of purchases and the balance and percentage of the related payables at the end of the period.
 - (2) The amount and percentage of sales and the balance and percentage of the related receivables at the end of the period.
 - (3) The amount of property transactions and the amount of resulting profits or losses.
 - (4) The balance of negotiable instrument endorsements or guarantees or pledges of collateral at the end of the period and the purposes.
 - (5) The highest balance, the end-of-period balance, the interest rate range, and total current interest with respect to financing of funds.
 - (6) Other transactions that have a material effect on the profit or loss of the period or on the financial position, such as the rendering or receiving of services.
- (IV) Information on major shareholders: The name, shareholding, and shareholding ratio of the shareholders with an equity ratio of 5% or more. (Table 11)

XLV. Segment information

- (I) Basic information on operating segments
 - 1. Classification of operating segments

The information was provided for the chief operating decision maker to distribute resources and evaluate the performance of each department. It focused on the type of each batch of products or services delivered or provided. The reportable segments of the Group are as follows:

(1) Automation segment

Responsible for automated flow line equipment and supporting equipment for T.F.T. process equipment, semiconductor process equipment, industrial conveying machinery, and automated storage equipment; parking tower and mechanical parking equipment, incinerator and other environmental facilities; electronic anti-static products; production, sale, installation, and lease of window-cleaning equipment and hanging platforms.

(2) Manufacture of solar power system, parts and components

Responsible for manufacture of power generation, transmission and distribution equipment as well as cable and wireless communication machines and devices.

(3) Electronic parts and components segment

Responsible for manufacture of electronics parts and components

(4) Other segments

Responsible for the business of solar water heater and real estate business.

2. Principles in measurement of operation segment's profits, losses, assets and liabilities

The accounting policy of the operating segments is the same as the important accounting policies stated in Note 4. The profit or loss of the Group's operating segments is measured based on the operating profit or loss controllable to the segment manager. It is used as a basis for evaluation of management performance. Debts are allocated in consideration of the capital cost and movement of funds of the Group as a whole. Since debts are not controllable separately to the manager of each operating segment, they are not used as a basis for evaluation of the management performance.

(II) Segment revenue and operating result

The revenue and operation outcome of the Group's continuing operations are analyzed by reportable segment as follows:

unaryzed by reportat	_		20	021		
	Automation 1	Automation 2	Solar power system, parts and components	Electronic parts and components	Others (Vietnam, Fraternity, Fuqing, automation)	Total
Revenue from external customers Inter-segment income Segment income Internal write-off Consolidated revenue segment profit or loss Dividend revenue Profit on disposal of property,	\$ 1,228,454 56 1,228,510 (56) \$ 1,228,454 \$ 8,793	\$ 573,720 66,716 640,436 (66,716) \$ 573,720 (\$ 153,578)	\$ 1,583,558 	\$ 653,024 	\$ 149 3,545 3,694 (3,545) \$ 149 (\$ 27,378)	\$ 4,038,905
plants and equipment						3,823
Disposal of investment property benefits						57,788
Share of profit/loss of associates under the equity method Profit or loss on valuation of financial assets measured at fair value through profit or						288
loss Net profit (loss) before tax						49,173 (\$ 889,000)
			20	020		
	Automotion 1	Automation 2	Solar power system, parts and	Electronic parts	Others (Vietnam, Fraternity, Fuqing,	Total
Revenue from external	Automation 1	Automation 2	Solar power system, parts and components	Electronic parts and components	(Vietnam, Fraternity, Fuqing, automation)	Total
customers Inter-segment income Segment income Internal write-off Consolidated revenue segment profit or loss Dividend revenue	Automation 1 \$ 919,345	Automation 2 \$ 512,317	Solar power system, parts and	Electronic parts	(Vietnam, Fraternity, Fuqing,	Total \$ 4,298,290
customers Inter-segment income Segment income Internal write-off Consolidated revenue segment profit or loss	\$ 919,345 31,819 951,164 (31,819) \$ 919,345	\$ 512,317	Solar power system, parts and components \$ 2,193,597	Electronic parts and components \$ 673,014	(Vietnam, Fraternity, Fuqing, automation) \$ 17	\$ 4,298,290
customers Inter-segment income Segment income Internal write-off Consolidated revenue segment profit or loss Dividend revenue Net losses on disposal of property, plant and equipment	\$ 919,345 31,819 951,164 (31,819) \$ 919,345	\$ 512,317	Solar power system, parts and components \$ 2,193,597	Electronic parts and components \$ 673,014	(Vietnam, Fraternity, Fuqing, automation) \$ 17	\$ 4,298,290 175,463 4,473,753 (175,463) \$ 4,298,290 (\$ 51,631) 1,811 (325)

The segment profit or loss is the earnings or loss of each segment excluding the administration costs of the head office to be shared and the compensation of the directors and supervisors, the portion of affiliates accounted for under the equity method, loss and gain from disposal of property, plant and equipment, loss and gain from disposal of subsidiaries, financial tool valuation gain (loss), and income tax expense. These estimated amounts were provided for the chief operating decision maker to distribute resources to departments and evaluate their performance.

(III) Total segment assets

Segment assets	December 31, 2021	December 31, 2020
Continuing operations		
Automation segment	\$ 3,773,107	\$ 3,445,376
Manufacture of solar		
power system, parts and		
components	3,034,048	3,096,762
Electronic parts and		
components segment	833,717	885,340
Other segments	868,643	1,724,098
Total segment assets	8,509,515	9,151,576
Unallocated assets (Note)	2,007,961	1,099,947
Total consolidated assets	<u>\$10,517,476</u>	<u>\$10,251,523</u>

Note: These include financial assets measured at fair value through profit or loss, financial assets measured at fair value through other comprehensive income, investment property, investments under the equity method, and deferred income tax assets.

Purpose of monitoring segment performance and distributing resources to segments:

Except for unallocated assets, all the assets are allocated to reportable segments. The assets shared by reportable segments are allocated based on the revenue of each reportable segment.

(IV) Information by territory

The Group has three main operation bases – Taiwan, China and Vietnam.

The Group's revenue of continuing operations from external clients and the noncurrent assets were classified respectively by operation base and location. Relevant information is listed as follows:

	Income from e	external clients	Non-current assets			
			December 31,	December 31,		
	2021	2020	2021	2020		
Taiwan	\$ 1,691,505	\$ 1,175,989	\$ 2,697,667	\$ 2,535,062		
Mainland China	957,560	870,398	1,458,231	946,456		
Hong Kong	539,944	1,437,369	-	-		
Others	849,896	814,534	366,873	1,005,453		
	<u>\$ 4,038,905</u>	<u>\$ 4,298,290</u>	<u>\$ 4,522,771</u>	<u>\$ 4,486,971</u>		

Non-current assets do not include the financial assets measured at fair value through profit or loss, financial assets measured at fair value through other comprehensive income, financial assets measured at amortized cost, investments under the equity method, and deferred income tax assets.

(V) Information about major clients

The single customer from which the income earned reached more than 10% of the Group's total income:

	2021			2020	
		Percentage in			Percentage in
Customer ID	Amount	revenue %	Customer ID	Amount	revenue %
BM company	\$ 450,300	11	BM 公司	\$ 1,364,847	32

- Note 1: Number column description:
 - (1) 0 is reserved for issuer.
 - (2) Each invested company is numbered in sequential order starting from 1.
- Note 2: KENMEC MECHANICAL ENGINEERING CO., LTD.'s limit of loans to others is calculated as follows: Ceiling of loans to particular borrower: 20% of the Company's net value: \$3,389,220×20%=677,844 Ceiling of total loaning of funds: 40% of the Company's net value: \$3,389,220×40%=1,355.688
- Note 3: KENMEC AUTOMATION ENGINEERING (KUNSHAN)'s limit of loans to others is calculated as follows: Ceiling of loans to a single borrower: 40% of the Company's net value: RMB 48,138×40% = RMB 19,255

 The limit of total loaning of funds: 40% of the Company's net value: RMB 48,138×40% = RMB 19,255

For the loaning of funds between the foreign companies that belong to the same parent company as the Company and whose 100% voting shares are held by the Company directly and indirectly, its amount is not subject to 40% of the net value. Ceiling of loans to a single borrower: 100% of the Company's net value: RMB 48,138×100% = RMB 48,138

The limit of total loaning of funds: 100% of the Company's net value: RMB 48,138×100% = RMB 48,138

Note 4: KENMEC TECHNOLOGY (FUQING) CO., LTD.'s limit of loans to others is calculated as follows: Ceiling of loans to a single borrower: 40% of the Company's net value: RMB 27,610×40%=RMB 11,044

The limit of total loaning of funds: 40% of the Company's net value: RMB 27,610×40%=RMB 11,044

For the loaning of funds between the foreign companies that belong to the same parent company as the Company and whose 100% voting shares are held by the Company directly and indirectly, its amount is not subject to 40% of the net value. Ceiling of loans to a single borrower: 100% of the Company's net value: RMB 27,610×100% = RMB 27,610

The limit of total loaning of funds:100% of the Company's net value: RMB 27,610×100%=RMB 27,610

Note 5: KENMEC TECHNOLOGY (SUZHOU) CO., LTD.'s limit of loans to others is calculated as follows:

Ceiling of loans to a single borrower: 40% of the Company's net value: RMB 54,534×40% = RMB 21,814

The limit of total loaning of funds:40% of the Company's net value: RMB 54,534×40% = RMB 21,814

The closing balance of loaning of funds by Kenmec Technology (Suzhou) Co., Ltd. to Suzhou Kenmec Property Development Ltd. exceeded the limit of a single loan due to the refund of shares by capital reduction in June 2021. The company submitted an improvement plan at the Board meeting held on March 18, 2022. As of March 18, 2022, a sum of RMB 15,000,000 has been repaid.

Note 6: Fraternity Trade Development (KunShan) Co., Ltd.'s limit of loans to others is calculated as follows:

Ceiling of loans to a single borrower: 40% of the Company's net value: RMB 27,016×40% = RMB 10,806

The limit of total loaning of funds:40% of the Company's net value: RMB 27,016×40% = RMB 10,806

For the loaning of funds between the foreign companies that belong to the same parent company as the Company.

For the loaning of funds between the foreign companies that belong to the same parent company as the Company and whose 100% voting shares are held by the Company directly and indirectly, its amount is not subject to 40% of the net value. Ceiling of loans to a single borrower: 100% of the Company's net value: RMB 27,016×100% = RMB 27,016

The limit of total loaning of funds:100% of the Company's net value: RMB 27,016×100% = RMB 27,016

Note 7: Tainergy Tech. Co., Ltd.'s limit of loans to others is calculated as follows:

Ceiling of loans to particular borrower: 20% of the Company's net value: 1,694,225×20%=338,835

Ceiling of total loaning of funds: 40% of the Company's net value: 1,694,225×40%=677,690

Note 8: Tainergy Technology (Kunshan) Co., Ltd.'s limit of loans to others is calculated as follows:

Ceiling of loans to a single borrower: 40% of the Company's net value: RMB 152,479×40% = RMB 60,992

The limit of total loaning of funds: 40% of the Company's net value: RMB 152,479×40% = RMB 60,992

Note 9: Kentec Inc.'s limit of loans to others is calculated as follows:

Ceiling of loans to particular borrower: 20% of the Company's net value: \$536,717×20% = 107,343

Ceiling of total loaning of funds: 40% of the Company's net value: \$536,717×40% = 214,687

Note 10: The net value is determined based on the financial statements audited and certified by CPAs in the most recent year.

Note 1: The business transactions between the parent company and its subsidiaries shall be indicated in the "No". column. This column shall be completed as follows:

 ⁰ is reserved for the parent company.
 Each subsidiary is numbered in sequential order starting from 1.

- Note 2: The relationship with the related parties is classified into seven categories as follows. It is only necessary to mark the type. (Repeated disclosure is not necessary for the same transaction between the parent company and its subsidiaries or between the subsidiaries. In case of the transaction in the form of parent company to a subsidiary, for example, if the parent company has disclosed the transaction, the subsidiary is not necessary to disclose the same repeatedly; In case of the transaction in the form of subsidiary, if a subsidiary has disclosure the transaction, the other subsidiary is not necessary to disclose the same.)
 - 1. Parent company to subsidiary
 - 2. Subsidiary to parent company
 - 3. Subsidiary to subsidiary
- Note 3: For calculating the percentage of the transaction amount in total consolidated operating revenue or assets, the share of the balance at ending of the period in the consolidated total assets is used as the basis of the calculation under the title of assets/liabilities; the share of the interim accumulated amount in the total consolidated operating revenue is used as the basis for the calculation under the title of profit/loss.
- Note 4: Related transactions and period-end balances were removed from the consolidated financial statements.

Note 1: Investment is carried out through the following 3 means: (1) Engaged in direct investment in Mainland China.

- (2)-(1) Invested in Mainland China through Kenmec International Holding (BVI) Co., Ltd.
- (2)-(2) Invested in Mainland China through Ample Assets Holdings Ltd.
- (2)-(3) Invested in Mainland China jointly through Kenmec Mecha-Tronics (Suzhou) Co., Ltd. and Tainergy Technology (Kunshan) Co., Ltd.
- (2)-(4) Invested in Mainland China through Kenmec Communication Holding (BVI) Co., Ltd.
- (2)-(5)Invested in Mainland China through Tainergy Tech Holding (Samoa) Co., Ltd.
- (2)-(6) Invested in Mainland China through Tainergy Technology (Kunshan) Co., Ltd.
- (2)-(7) Invested in Mainland China through Kenmec Automation Engineering (Kunshan).
- (3) Other means.
- Note 2: In the "Profit (loss) from investments recognized in the current period" column:
 - (1) An indication is needed if the investment is under preparation and there is no profit or loss.
 - (2) There are following three profit/loss recognition bases. The appropriate one must be indicated.
 - A. The financial statements audited and approved by an international accounting firm that has collaboration relationship with an accounting firm in the Republic of China.
 - B. The financial statements audited and approved by a CPA of the parent company in Taiwan.
 - C. Others (the unaudited financial statements of the aforesaid investees for the same period).
- Note 3: The earnings of the liquidated invested KENMEC Automation Engineering (Suzhou) Co., Ltd. Amounting to USD 3.90 million were used for capital increase.
- Note 4: The operating funds of the invested KENMEC MECHA-TRONICS (SUZHOU) CO., LTD. were used for reinvestment amounting to RMB 172 million and the operating funds of the invested Tainergy Technology (Kunshan) Co., Ltd. were used for investment amounting to RMB 80 million.
- Note 5: The operating funds of the invested Tainergy Technology (Kunshan) Co., Ltd. were used for reinvestment amounting to RMB 4.5 million.
- Note 6: In June 2021, Kenmec Technology (Suzhou) Co., Ltd. reduced its capital and refunded USD 15.2 million in shares.
- 2. Limit on the amount of investments in Mainland China:

Unit: foreign currency thousand/NTD thousand

Accumulated amount of investments from Taiwan to Mainland China at the end of current period (Note 7)	Investment amount approved by the Investment Commission, MOEA	Limit on the amount of investments in Mainland China specified by the Investment Commission, MOEA (Note 8)

Kenmec Mechanical Engineering Co., Ltd. and Subsidiaries Information on Major Shareholders 2021

Table 11

	Shares				
Names of major shareholders	Number of shares	Shareholding			
	held	percentage			
CHING-FU HSIEH	24,079,707	9.67%			
YUEH-CHEN LIN	18,181,345	7.30%			

- Note 1: The information on major shareholders is acquired from the data of Taiwan Depository & Clearing Corporation with respect to the shareholders holding aggregately 5% or more of the common and special stocks of the Company that have been registered and delivered in dematerialized form (including treasury stocks) on the last business day at the end of the current quarter. The capital stock stated in the consolidated financial reports of the Company may be different from the number of stocks that have been actually registered and delivered in dematerialized form due to different bases of compilation and calculation.
- Note 2: In case any shareholder who transferred their stocks to a trustee, the information on such shareholder was disclosed based on the account of the principal subject to the trust account opened by the trustee. As for a shareholder who declares insider shares of more than 10% shareholdings pursuant to the securities and exchange regulations, the number of shares held includes the shares of the shareholder and the shares that he/she transferred to a trustee and for which he/she has the right to determine the application of the trust property. For more information on the declaration of insider shares, refer to the MOPS.
